EXPLORE

Compendium

Compendium - Education Center is a training center that offers the IT market up to date quality training courses for advanced telecommunication and information technologies in Central and Eastern Europe. Our beneficial relationship with leading producers of innovative products and technologies provides many opportunities to promote their solutions in markets that have the highest investment potential and education needs in Central Europe. We deliver stationary trainings (ILT), Distance Learning (VILT) and Hybrid trainings. Stationary trainings are usually held at our locations in Krakow and Warsaw, but also at a location determined

by the client. At each location we provide modern technical facilities, managed by experienced staff. Distance Learning is training that takes place completely remotely using video conferencing over the Internet. Participants have uninterrupted contact with the Trainer and have access to remote laboratories to perform exercises. Hybrid mode training is a combination of stationary mode and Distance Learning. Thanks to the advanced technology provided by Compendium CE, participants who are in the room as well as remote participants have uninterrupted contact with the trainer and other participants.

TRAINERS

Our training policy for specialized products, which require excellent trainers qualifications and a complex equipment base, will help expand Compendium's EC educational activity in Central and Eastern Europe.

LOCATIONS

Most of the training sessions take place in Poland, although Compendium EC is able to provide selected authorized training programs abroad. The training sessions are delivered in English.

MATERIALS

The new standard of courses offered by Compendium EC provides useful materials that make it possible to transform a technological theory into practical business values, realize stable progress, and that promotes innovation in the face of rapid technological change.

STATIONARY LEARNING

Stationary trainings are usually held in our locations in Cracow and Warsaw, but also in a place determined by the client. Compendium CE provides the necessary professional equipment for the training participants. Participants of stationary trainings are provided with coffee breaks and lunch. The course is supplemented by laboratories, where you will perform all practical tasks included in the training program under the supervision of the trainer.

DISTANCE LEARNING

Compendium Distance Learning is a distance training programme based on the latest Internet video-conference technology.

The coach and participants of on-site training see and hear Distance Learning participants and the other way round: persons located out of meeting venue participate in the training by following the events in the training room on their screens and may actively participate in discussions with the coach and the group

HYBRID LEARNING

Hybrid training is a program of courses delivered in two modes at once - stationary and remotely using video conferencing over the Internet. The advanced technology provided by Compendium CE allows the Trainer and participants of the onsite training to see and hear the participants in the Distance Learning mode and vice versa. It also provides the ability to take part in conversations with the trainer and the group regardless of the training mode. The course is supplemented by desktop and remote labs for participants in dlearning mode, where you will perform all the practical tasks included in the training program under the guidance of the trainer.

Our mission is to
provide specialized
training courses in
advanced products
and teleinformation
technologies

AMAZON WEB SERVICES (AWS)

ABOUT PRODUCER

In 2006, Amazon Web Services (AWS) began offering IT infrastructure services to businesses in the form of web services -- now commonly known as cloud computing. One of the key benefits of cloud computing is the opportunity to replace up-front capital infrastructure expenses with low variable costs that scale with your business. With the Cloud, businesses no longer need to plan for and procure servers and other IT infrastructure weeks or months in advance. Instead, they can instantly spin up hundreds or thousands of servers in minutes and deliver results faster.

Today, Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world. With data center locations in the U.S., Europe, Brazil, Singapore, Japan, and Australia

To learn more, visit AWS at <https://aws.amazon.com/>

Compendium Education Center holds the title of official AWS Training Partner - AWS Training Partner. Thus, it can offer and resell official AWS training, including live-delivered training as well as digital training by AWS.

CAPSTONE COURSEWARE

ABOUT PRODUCER

CAPSTONE COURSEWARE WAS FOUNDED IN 2006 BY ITS CURRENT PRESIDENT, WILL PROVOST. WILL IS AN ACTIVE WRITER, CONSULTANT, AND TEACHER WHO SPECIALIZES IN STANDARDS-BASED BUSINESS SOFTWARE — PRIMARILY JAVA, XML, AND WEB SERVICES.

We know that successful IT training relies on three critical factors: the instructor, the courseware, and the learning environment. We intend to act as a partner in this process, providing excellent training materials that help the instructor to function at his or her highest level, and making it easy to prime the classroom with tools and hands-on exercises for effective learning.

COMPTIA

ABOUT PRODUCER

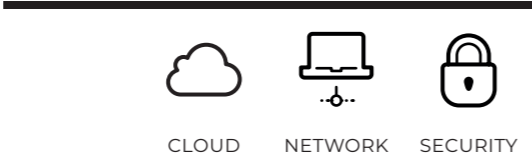

COMPTIA IS THE LEADING PROVIDER OF VENDOR-NEUTRAL IT CERTIFICATIONS IN THE WORLD. WE OFFER 16 CERTIFICATION EXAMS IN PC SUPPORT, NETWORKING, SERVERS, LINUX, SECURITY AND MORE.

CompTIA has been delivering certification exams for more than 20 years and is committed to continually improving the service we provide to the industry.

CompTIA's strength in certification comes in no small part from the support we receive from the industry. Thousands of companies depend on CompTIA standards to provide a reliable predictor of employee success. Additionally, dozens of companies with their own certification programs rely on our exams to provide an industry standard for foundation-level skills sets as prerequisites or electives in their certification programs.

In addition to professional certifications, CompTIA supports and leads the global IT industry through education, advocacy and philanthropy initiatives.

HPE (HEWLETT PACKARD ENTERPRISE)

ABOUT PRODUCER

Hewlett Packard Enterprise Poland has been in business since 1991 and has remained the largest IT company in Poland since 1997 (according to Teleinfo 500 and Computerworld Top 200). It offers a full range of IT products and services - from computers and servers to advanced IT solutions for the public and private sectors. HPE is a global leader in providing cutting-edge technology, IT infrastructure, services, and printing and imaging solutions.

Compendium Centrum Edukacyjne is the only one in Poland with Authorized HPE Training Reseller status. It organizes all authorized courses that are included in the HPE Education offer. HPE training solutions are created according to the needs of clients. The right set of methods and tools, ensures the most effective transfer of knowledge under the given conditions, thus improving employee performance. HPE training solutions are a selection of training courses for employees, managers and technical staff in areas such as HPE technologies, IT applications, processes and compliance. HPE training can help increase user awareness and facilitate the deployment and adoption of new technologies without compromising productivity, while increasing the return on investment in IT projects.

ISC2

ABOUT PRODUCER

The International Information System Security Certification Consortium, or ISC2, is a non-profit organization which specializes in training and certifications for cybersecurity professionals. It has been described as the „World's Leading Cybersecurity Professional Organization”.

ISC2 information security certifications are recognized as the global standard for excellence. They allow you to prove your expertise and highlight your skill mastery. And for employers, having certified employees means your organization is better prepared to protect your critical information assets and infrastructures.

ISC2 created and maintains the Common Body of Knowledge (CBK) on which the certifications are based. The CBK defines global industry standards and best practices in information security. ISC2 - Cert To learn more, visit ISC2 at <https://www.isc2.org/>

Compendium Educational Center is an official partner of ISC2, offering authorized training courses conducted by certified experts and based on always up-to-date materials in accordance with exam requirements. The ISC2 training offer at Compendium CE includes all available authorized ISC2 courses delivered based on the ISC2 Common Body of Knowledge (CBK®) which provide a comprehensive review of knowledge and preparation for the listed certification exams: CISSP, SSCP, CCSP, CGRC, CSSLP, HCISPP and CC.

ABOUT PRODUCER

Netskope, a global SASE leader, is redefining cloud, data, and network security to help organizations apply Zero Trust principles to protect data. Fast and easy to use, the Netskope platform provides optimized access and zero trust security for people, devices, and data anywhere they go. Netskope helps customers reduce risk, accelerate performance, and get unrivaled visibility into any cloud, web, and private application activity. Thousands of customers, including more than 25 of the Fortune 100, trust Netskope and its powerful NewEdge network to address evolving threats, new risks, technology shifts, organizational and network changes, and new regulatory requirements. For more information about Netskope, please visit www.netskope.com

Compendium CE is a Netskope Authorized Training Partner (ATP). As part of its ATP authorization, Compendium CE offers two authorized training courses, NSCO&A and NSCI&I, which prepare participants for the certifications: Netskope Certified Cloud Security Administrator and Netskope Certified Cloud Security Integrator.

OFFSEC

ABOUT PRODUCER

OffSec (formerly Offensive Security), founded in 2007, is a leader in cyber security training and certification. The company has created a standard of training that is recognized by the industry as one of the most valuable, and certification exams that are considered among the most rigorous available on the market, and which verify actual practical skills. OffSec also develops popular open source projects such as Kali Linux, Exploit Database and Metasploit Unleashed. For more information, visit: www.offsec.com/community-projects/

Compendium Centrum Edukacyjne is proud to be the Polish official OffSec's Learning Partners. OffSec's Learning Partners use official course content developed by OffSec. This ensures training content is relevant and up-to-date accordance with the certification exams objectives. In Compendium CE are available all OffSec official training as e-learning products and as well as in Blended Learning training mode with live instructor days. OffSec courses lead to career-relevant cybersecurity certifications: OSCP, OSEP, OSWA, OSWE, OSDA, OSED.

ABOUT PRODUCER

PECB MISSION IS TO PROVIDE OUR CLIENTS COMPREHENSIVE EXAMINATION AND CERTIFICATION SERVICES FOR INDIVIDUALS.

Certification represents the intersection of protection of the public, fairness to candidates, and often, various interests of the profession. Although these may appear to be competing interests, a well-designed certification program will be most effective in meeting these interests when its resources are deployed to enhance validity and reliability.

The guidance that follows in our Quality Manual is intended to ensure that PECB develops, maintains and improves a high quality recognized certification program.

ABOUT PRODUCER

DevOps Institute brings enterprise-level DevOps training and certification to the IT market. It is a global learning community that helps develop both technical knowledge and personal experience to best help implement the DevOps approach: on the job, in personal development, in creating communities focused on continuous learning, in implementing new DevOps practices, while setting standards for competency-based training and certification.

DevOps Institute focusing on DevOps-related topics, including SRE or DevSecOps supports professionals at all levels in creating a better human connection in the IT world.

Training based on practical knowledge, a network of professionals and the latest research provides participants with the know-how to improve their team and organization and advance their careers.

Compendium Education Center is an official education partner of the DevOps Institute, which means that it is an authorized center authorized to conduct all the courses offered by the DevOps Institute.

All training courses offered are also an excellent opportunity to prepare for the accompanying certification exams: DevOps Leader (DOL), DevSecOps Foundation (DSOF), Site Reliability Engineering (SRE), Certified Agile Service Manager (CASM), etc.
