Szkolenie: Google Cloud
Agent Platform and Generative AI Security

Cel szkolenia:

This course is designed to empower your organization to fully harness the transformative potential of Google's Agent Platform and generative AI (gen AI) technologies, with a strong emphasis on security. Tailored for AI practitioners and security engineers, it provides targeted knowledge and hands-on skills to navigate and adopt AI safely and effectively. Participants will gain practical insights and develop a security-conscious approach, ensuring a secure and responsible integration of gen AI within their organization.

What you'll learn:

- Establish foundational knowledge of Agent Platform and its security challenges.
- Implement identity and access control measures to restrict access to
- Agent Platform resources.
- Configure encryption strategies and protect sensitive information.
- Enable logging, monitoring, and alerting for real-time security oversight of Agent Platform operations.
- Identify and mitigate unique security threats associated with generative AI.
- Apply testing techniques to validate and secure generative AI model responses.
- Implement best practices for securing data sources and responses within Retrieval-Augmented Generation (RAG) systems.
- Establish foundational knowledge of AI Safety.

Audience

AI practitioners, security professionals, and cloud architects.

Products

- Agent Platform
- Sensitive Data Protection

Compendium Centrum Edukacyjne Spółka z o.o.
ul. Tatarska 5, 30-103 Kraków, tel.: (12) 298 47 77
ul. Postępu 18B, 02-676 Warszawa, tel.: (22) 417 41 70

BNP Paribas Bank Polska S.A.
Oddział w Warszawie
Nr konta: PL 20 1600 1462 1853 6451 3000 0001

- Gemini Enterprise
- Agent Engine Threat Detection
- Model Armor
- Agent Studio on Gemini Enterprise Agent Platform
- Access Context Manager
- Privileged Access Manager
- Advanced Networking
- Confidential External Key Manager
- Google Cloud Observability
- Gemini
- Cloud IAM
- Cloud VPC
- Cloud KMS
- Cloud Operations

Plan szkolenia:

- Module 1 - Introduction to Agent Platform Security Principles
  - Topics:
    - Google Cloud Security
    - Agent Platform components
    - Agent Platform Security concerns
  - Objectives:
    - Review Google Cloud Security fundamentals.
    - Establish a foundational understanding of Agent Platform.
    - Enumerate the security concerns related to Agent Platform features and components.
  - Activities:
    - Lab: Agent Platform: Training and Serving a Custom Model
- Module 2 - Identity and Access Management (IAM) in Agent Platform
  - Topics:
    - Overview of IAM in Google Cloud
  - Objectives:
    - Control access with Identity Access Management.
    - Simplify permission using organization hierarchies and policies.

- Use service accounts for least privileged access.
- Activities:
  - Lab: Service Accounts and Roles: Fundamentals
- Module 3 - Data Security and Privacy
  - Topics:
    - Data encryption
    - Protecting Sensitive Data
    - VPC Service Controls
    - Disaster recovery planning
  - Objectives:
    - Configure encryption at rest and in-transit.
    - Encrypt data using customer-managed encryption keys.
    - Protect sensitive data using the Data Loss Prevention service.
    - Prevent exfiltration of data using VPC Service Controls.
    - Architect systems with disaster recovery in mind.
  - Activities:
    - Lab: Getting Started with Cloud KMS
    - Lab: Creating a De-identified Copy of Data in Cloud Storage
- Module 4 - Securing Agent Platform Endpoints and model deployment
  - Topics:
    - Network security
    - Securing model endpoints
  - Objectives:
    - Deploy ML models using model endpoints.
    - Secure model endpoints.
  - Activities:
    - Lab: Configuring Private Google Access and Cloud NAT
- Module 5 - Monitoring and logging in Agent Platform
  - Topics:
    - Logging
    - Monitoring
  - Objectives:
    - Write to and analyze logs.
    - Set up monitoring and alerting.
- Module 6 - Security risks in generative AI applications
  - Topics:

        - Overview of gen AI security risks
        - Overview of AI Safety
        - Prompt security
        - LLM safeguards
    - Objectives:
        - Identify security risks specific to LLMs and gen AI applications.
        - Understand methods for mitigating prompt hacking and injection attacks.
        - Explore the fundamentals of securing generative AI models and applications.
        - Introduce fundamentals of AI Safety.
    - Activities:
        - Lab: Safeguarding with Agent Platform Gemini API
        - Lab: Gen AI & LLM Security for Developers
- Module 7 - Testing and evaluating generative AI model responses
    - Topics:
        - Testing generative AI model responses.
        - Evaluating model responses.
        - Fine-Tuning LLMs.
    - Objectives:
        - Implement best practices for testing model responses.
        - Apply techniques for improving response security in gen AI applications.
- Module 8 - Securing Retrieval-Augmented Generation (RAG) systems
    - Topics:
        - Fundamentals of Retrieval-Augmented Generation
        - Security in RAG systems
    - Objectives:
        - Understand RAG architecture and security implications.
        - Implement best practices for grounding and securing data sources in RAG systems.
    - Activities:
        - Lab: Multimodal Retrieval Augmented Generation (RAG) Using the Agent Platform Gemini API
        - Lab: Introduction to Function Calling with Gemini

Wymagania:

Fundamental knowledge of machine learning, in particular generative AI, and basic understanding of security on Google Cloud.

Compendium Centrum Edukacyjne Spółka z o.o.
ul. Tatarska 5, 30-103 Kraków, tel.: (12) 298 47 77
