

Szkolenie: Micro Focus PAM250 - Privileged Account Manager

Cel szkolenia:

Privileged Account Manager gives you control of who has super-user access, when such access can be utilized, and provides audit information and provable compliance on super-user activity in your systems. Learn the basic concepts of Privileged Account Manager and how to perform a simple installation by taking this course. You will install, configure, and test your installation of Privileged Account Manager as well as learn about command control, how to audit, and how to run reports on super-user activity.

The hands-on labs for this course use version 3.5 of the software.

Upon successful completion of this course, you should be able to:

- Install Privileged Account Manager
- Configure the Privileged Account Manager
- Create rules
- Configure audit and event reporting
