

Szkolenie: Micro Focus Universal Configuration Management Database Interactive Training created by ART

Cel szkolenia:

Users will gain an understanding of the important key concepts, as well as gain competency in both the navigation and functionality of the Universal Configuration Management Database (UCMDB) application.

The simulations in this course use UCMDB version 10.3.

Upon successful completion of this course, you should be able to:

- Define a Configuration Management System
- Access UCMDB views using the UCMDB Browser
- Create CIs and describe CI relationships
- Manage UCMDB reports

Plan szkolenia:

- Introduction to Configuration Management System
 - Introduction
 - Objectives
 - ITIL Defined
 - Components of a Configuration Management System
 - CMS and Other Processes
 - CMS Architecture – A System of Systems
 - CMS Target Users
