Szkolenie: Microsoft
MS-55077 Project Server 2013 Development

Microsoft Partner

Cel szkolenia:

This course will show students how to develop application using the various APIs available in Project Server including Project Server Interface (PSI), .NET Client Side Object Model, JavaScript Object Model and REST. In addition, you will learn how to extend on-premise Project Server installs via web parts, local and remote event handlers, Apps via the new App Model and workflows.

After completing the course, students will be able to:

- Develop applications for Project Server using PSI and CSOM.
- Develop and create Project Server workflows.

Audience profile:

This course is intended for anyone that needs to build applications that leverage Project Server 2013.

Plan szkolenia:

- Overview
- Project Server Introduction
  - Introduction
  - Architecture
  - Development Basics
- Project Service Interface (PSI)
  - Project Server Interface
- Client Side Object Model
  - Client Side Object Model
  - JavaScript Object Model
- REST API
  - REST APIs
- Programming Project Server
  - Extending Project Server UI
  - Event Receivers
- Developing Reports
