Cel szkolenia:

This one day course is designed for system administrators, DevOps, system engineers and others who want to be able to deploy SUSE Cloud Application Platform.

Participants install SUSE Cloud Application Platform on SUSE CaaS Platform, Microsoft Azure AKS, and Amazon EKS. In this course, the participants have the opportunity to create Kubernetes clusters with public cloud providers as well as seeing how to install in an on-premise Kubernetes cluster.

During this course you will learn:

- Install and Configure SUSE Cloud Application Platform on SUSE CaaS Platform 3
- Install and Configure SUSE Cloud Application Platform on Microsoft Azure
- Install and Configure SUSE Cloud Application Platform on Amazon EKS

Audience Summary

This course is designed for system administrators and others who need to install SUSE Cloud Application Platform on SUSE CaaS Platform, Microsoft Azure AKS or Amazon EKS.

Plan szkolenia:

- Installation on SUSE CaaS Platform
- Installation on Microsoft Azure

- Installation on Amazon AWS

Wymagania:

Attendees should have familiarity interacting with and administering public cloud accounts and they should know how to use SUSE CaaS Platform or another Kubernetes platform and Helm.

Poziom trudności

Certyfikaty:

The participants will obtain certificates signed by SUSE.

Prowadzący:

Certified SUSE Trainer.
