

Szkolenie: HPE Veeam® Backup & Replication<sup>™</sup> v12.1: Configure, Manage, and Recover (VMCE)

#### DOSTĘPNE TERMINY

2025-09-15 | 4 dni | Warszawa / Wirtualna sala 2025-10-27 | 4 dni | Warszawa / Wirtualna sala *(Termin gwarantowany)* 2025-12-01 | 4 dni | Warszawa / Wirtualna sala

### Cel szkolenia:

Veeam Backup & Replication v12.1: Configure, Manage, and Recover is a technical course that provides IT professionals with the skills needed to configure, manage, and support a Veeam Backup & Replication v12.1 solution. With extensive hands-on labs, the class teaches administrators and engineers how to effectively protect and manage data in ever-changing technology and business environments, bringing tangible benefits to businesses in the digital world.

This course is based on Veeam Backup & Replication v12.1, part of Veeam Data Platform, and is approximately 60% theory and 40% hands-on labs

#### Course objectives

After completing this course, you should be able to:

- Describe Veeam security concepts
- $\circ~$  Given a scenario, configure a backup job and a backup copy job
- $\circ$  Explain network-attached storage (NAS) backups and configuration
- Describe Veeam's replication capabilities
- $\circ~$  Determine appropriate use case for backups, replicas and/or continuous data protection
- $\circ~$  Configure backup infrastructure components, including proxy and repository servers
- $\circ\,$  Given a scenario, evaluate when and how to apply immutability settings
- Given a scenario, recover data from backups

#### Audience

This course is suitable for anyone responsible for configuring, managing, or supporting a Veeam Backup & Replication v12.1 environment.

## Plan szkolenia:

- Data protection strategies
  - $\circ\,$  Review of key data protection strategies that ensure the safety of your data.
- $\circ\,$  Analysis of risks to data
  - $\circ\,$  Explore different risk scenarios What risks do we face daily within our environment?
- What is protected?
  - $\circ\,$  Review of Veeam Data Platform and introduction to the class scenario.
- Security and protection considerations
  - Describe strategies and tools to secure the Veeam backup server to avoid unauthorized access and data leaks.
- Protecting workloads
  - $\circ\,$  Efficiently protect VMware and Hyper-V virtual machines based on well-defined SLAs through the creation of backup jobs.
- Deploying agents
  - Identify the use of protection groups to automate the installation of Veeam Agents and protecting workloads with agent backup jobs.
- Unstructured data backup
  - $\circ\,$  List required components and features available to protect unstructured data.
- Optimizing your backups
  - $\circ\,$  Analyze features and settings that allow backup storage optimization, faster backups, and data consistency.
- Immutability and hardened repositories
  - Describe backup data protection mechanisms to avoid premature deletion and unwanted modifications.
  - $\circ\,$  Identify characteristics and deployment steps of Linux Hardened Repositories to achieve backup data immutability.
- Backup infrastructure optimization
  - $\circ\,$  List deployment options and additional settings to improve general backup solution performance.
- Replication
  - $\circ\,$  Describe use cases, architectures, and features of replication jobs and continuous data protection (CDP) policies.
- Backup copy jobs
  - $\circ~$  Ensure recoverability and adhere to the 3-2-1 Rule with backup copy jobs.
- Long-term retention
  - $\circ\,$  List different mechanisms for data archiving, including grandfather-father-son retention policies.

- ∘ Scale-out Backup Repository<sup>™</sup>
  - Describe architecture, placement policies, data tiers, and management of Scale-out Backup Repositories.
- Move and copy backups with VeeaMover
  - $\circ\,$  Identify use cases for virtual machine and backup migrations with VeeaMover.
- Recovery verification
  - $\circ\,$  Create automated tests to ensure recoverability from backups and replicas.
- Veeam Backup Enterprise Manager
  - $\circ\,$  Describe the use cases for Veeam Backup Enterprise Manager.
- Incident Response Planning
  - $\circ\,$  Integrating Veeam Backup and Replication into your incident response plan.
- Advanced recovery features
  - $\circ\,$  Explore some more in-depth recovery features of Veeam Backup and Replication.
- Selecting the ideal recovery method
  - $\circ~$  What are the implications of different recovery methods and selecting the correct recovery method?
- Enacting a recovery
  - $\circ\,$  Get practice in recovering different recovery types with a variety of data types.
- Lab 1: Secure Veeam backup server
  - $\circ\,$  Lab 1.1: Secure the Veeam backup server
- Lab 2: Protect virtual machines
  - $\circ\,$  Lab 2.1: Add the virtual infrastructure to the Veeam Backup & Replication inventory
  - Lab 2.2: Protect virtual workloads
- Lab 3: Veeam Agent backup capabilities
  - Lab 3.1: Automate deployment of Veeam Agents
  - Lab 3.2: Protect physical workloads
- Lab 4: Unstructured data backup capabilities
  - $\circ\,$  Lab 4.1: Prepare Veeam infrastructure for file share backups
  - $\circ~$  Lab 4.2: Protect file share workloads
- Lab 5: Backup infrastructure optimization
  - $\circ\,$  Lab 5.1: Deploy a dedicated VMware backup proxy
  - $\circ\,$  Lab 5.2: Deploy a Veeam Hardened Repository
  - $\circ\,$  Lab 5.3: Deploy immutable object storage
- $\circ\,$  Lab 6: Second site backup and backup management
  - Lab 6.1: Create a backup copy job
  - Lab 6.2: Create a Scale-out Backup Repository (SOBR)
  - $\circ\,$  Lab 6.3: Create a dynamic backup job

- $\circ\,$  Lab 6.4: Migrate virtual machine backups to another job
- Lab 7: Building replication capabilities
  - $\circ\,$  Lab 7.1: Prepare Veeam infrastructure for virtual machine replication
  - $\circ\,$  Lab 7.2: Working with replication jobs
  - $\circ\,$  Lab 7.3: Working with CDP policies
- Lab 8: Testing virtual machine backups
  - $\circ\,$  Lab 8.1: Create a SureBackup job to verify backups
  - $\circ\,$  Lab 8.2: Create a SureBackup job to verify replicas
- Lab 9: Working with Veeam Backup Enterprise Manager
  - $\circ\,$  Lab 9.1: Connect the backup server with Veeam Backup Enterprise Manager
  - Lab 9.2: Decrypt an imported encrypted file
  - Lab 9.3: Create a restore operator user
- Lab 10: Application items recovery
  - $\circ\,$  Lab 10.1: Perform a Microsoft SQL Server instant database recovery
  - $\circ\,$  Lab 10.2: Restore an Active Directory user
- Lab 11: Recovering a guest OS file
  - $\circ\,$  Lab 11.1: Restore a guest operating system file
  - $\circ\,$  Lab 11.2: Restore a guest operating system file with disk publishing
- Lab 12: Full virtual machines recovery
  - $\circ\,$  Lab 12.1: Recover a virtual machine with Instant Recovery
  - $\circ\,$  Lab 12.2: Recover a virtual machine with full VM recovery and quick rollback
- $\circ\,$  Lab 13: Restore a physical machine from an Agent backup
  - $\circ\,$  Lab 13.1: Perform a bare metal recovery of a Windows physical machine from an Agent backup
  - $\circ\,$  Lab 13.2: Perform an instant VM recovery of a Linux physical machine from an Agent backup
- Lab 14: Restore from a replica
  - $\circ\,$  Lab 14.1: Disaster failover to a VMware vSphere  $\ensuremath{\mathbb{R}}$  replica and failback to production
  - $\circ\,$  Lab 14.2: Working with replica failover plans
  - $\circ\,$  Lab 14.3: Planned failover to a Microsoft Hyper-V replica
- $\circ\,$  Lab 15: Restore from a file share backup
  - $\circ~$  Lab 15.1: Recover a file share folder from backup
  - $\circ\,$  Lab 15.2: Recover an entire file share with instant file share recovery

# Wymagania:

 $\circ\,$  Students should have fundamental IT experience working with networking, servers, storage,

cloud, virtualization and operating systems.

• To get the most out of this course, students should be familiar with the core fundamental concepts of Veeam Backup & Replication through hands-on experience.

Poziom trudności

# Certyfikaty:

Completion of this course satisfies the prerequisite for the Veeam Certified Engineer (VMCE<sup>™</sup>) v12 exam.
