Szkolenie: HPE
HPE Data Fabric Cluster Administration

Cel szkolenia:

In this course, students gain the knowledge and skills to plan, install, maintain, and manage a secure HPE Ezmeral Data Fabric File and Object Store cluster. Using lecture and labs, you learn how to design and install a cluster, and perform pre- and post-installation testing. You configure users, groups, and work with key features of an HPE Ezmeral Data Fabric cluster, including volumes, snapshots, and mirrors—learn how to use remote mirrors for disaster recovery. This course also covers monitoring and maintaining disks, nodes, and how to troubleshoot basic cluster problems.

Course objectives

By the end of the course, the participant should be able to:

- Demonstrate basic cluster administration skills
- Audit and prepare cluster hardware prior to installation
- Run pre-installation tests to verify performance
- Plan a service layout according to cluster configuration and business needs
- Describe the primary architectural components of an HPE Data Fabric installation (nodes, storage pools, volumes, containers, chunks, blocks)
- Use the UI installer or the manual method to install the HPE Ezmeral Data Fabric File and Object Store cluster
- Define and implement an appropriate node topology
- Define and implement an appropriate volume topology
- Set permissions and quotas for users and groups
- Set up email and alerts
- Locate and review configuration files used by the cluster
- Start and stop services
- Use Hadoop commands to perform basic functions
- Use “maprcli” commands to perform basic functions
- Use the MCS
- Assist with data ingestion
- Configure, monitor, and respond to alerts
- Detect and replace failed disks

- Detect and replace failed nodes
- Create and delete snapshots using both maprcli and the MCS
- Create and delete mirrors using both maprcli and the MCS
- Use mirrors and snapshots for data protection
- Add, remove, and upgrade ecosystem components
- Monitor and tune job performance
- Set up NFS access to the cluster

Audience

System administrators who will be installing, configuring, and maintaining an HPE Ezmeral Data Fabric File and Object Store cluster environment.

Plan szkolenia:

- Module 1 - Introduction to HPE Ezmeral Data Fabric File and Object Store • Why data fabric?
  - Key features
  - Architecture basics
- Module 2 - Prepare for Installation
  - Security modes
  - Configuring data fabric security and managing impersonations
  - Plan the cluster and service layout
  - Prepare and verify cluster hardware
  - Test nodes
- Module 3 - Install a Data Fabric Cluster
  - Installer options
  - Perform a manual installation
  - License the cluster
- Module 4 - Verify and Test Cluster
  - Verify cluster status
  - Run post install benchmark tests
  - Explore the cluster structure
- Module 5 - Work with Volumes
  - Data fabric architecture
  - Object store architecture and operations
  - Node/volume topology

Compendium Centrum Edukacyjne Spółka z o.o.
ul. Tatarska 5, 30-103 Kraków, tel.: (12) 298 47 77
ul. Postępu 18B, 02-676 Warszawa, tel.: (22) 417 41 70

Nr konta: PL 20 1600 1462 1853 6451 3000 0001

- Attributes for standard volumes
- Design a volume plan
- Name container sizing
- Data tiering

- Module 6 - Work with Snapshots
  - Describe how snapshots work
  - Use and maintain snapshots
- Module 7 - Work with Mirrors
  - How mirrors work
  - Mirroring types
  - Using mirrors for disaster recovery
- Module 8 - Configure Users and Cluster Parameters
  - Manage users and groups
  - Use access control expressions
  - Accountable entities and quotas
  - Configuring policy-based security
  - Configuring object store access policies
- Module 9 - Configure Cluster Access
  - Access cluster data
  - Configure virtual IP addresses
  - Set up client access
- Module 10 - Monitor and Manage the Cluster
  - Monitor using the control system and CLI
  - Using HPE Ezmeral Data Fabric Monitoring (Spyglass Initiative)
  - Configure and respond to alarms
- Module 11 - Disk and Node Maintenance
  - Managing disks
  - Managing nodes
  - Configuring balancer settings
- Module 12 - Troubleshoot Cluster Problems
  - Basic troubleshooting
  - Tools and utilities

Wymagania:

Participants in this course should have:

Compendium Centrum Edukacyjne Spółka z o.o.
ul. Tatarska 5, 30-103 Kraków, tel.: (12) 298 47 77
ul. Postępu 18B, 02-676 Warszawa, tel.: (22) 417 41 70
BNP Paribas Bank Polska S.A.
Oddział w Warszawie
Nr konta: PL 20 1600 1462 1853 6451 3000 0001

- Basic Hadoop knowledge and intermediate Linux knowledge
- Experience using a Linux text editor such as vi
- Familiarity with the Linux command line options such as mv, cp, ssh, grep, and useradd

Poziom trudności

Certyfikaty:

The participants will obtain certificates signed by HPE (course completion).

Prowadzący:

Authorized HPE Trainer
