Cel szkolenia:

Office 365 is part of Microsoft 365. You can license Office 365 alone or as part of a Microsoft 365 subscription. Microsoft 365 includes additional Security and compliance features as well as Windows licenses on top of Office 365. Whilst this course focuses on the features in the Office 365 component, it is also applicable to organisations deploying and administering Microsoft 365.

This five-day course describes how to set up, configure and manage an Office 365 tenant including identities, and the core services of Microsoft 365. In this five-day course, you will learn how to plan the configuration of an Office 365 tenant including integration with existing user identities; plan, configure and manage core services; and report on key metrics.

Although this course and the associated labs are written for Office 365 with Windows 11, the skills taught will also be backwards compatible with Windows 10. This course is based on the features available in the Office 365 E3 license as these are the core features in Office 365 and Microsoft 365 plans.

Audience

Profile This course is intended for IT professionals who are responsible for planning, configuring, and managing an Office 365 environment. Students who attend this course are expected to have a fairly broad understanding of several on-premises technologies such as Domain Name System (DNS) and Active Directory Domain Services (AD DS). In addition, they should have a general understanding of Microsoft Exchange Server, Microsoft Teams, and Microsoft SharePoint.
