

Szkolenie: DevOps Institute

AlOps Foundation

DOSTĘPNE TERMINY

2025-12-04 | 2 dni | Kraków / Wirtualna sala

Cel szkolenia:

This AlOps Foundation course aims to cover the origins of AlOps including the history behind the term, patterns that preceded it and the technology context in which it has evolved. Learners will gain an understanding of the processes of combining big data analytics, machine learning algorithms, automation, and optimization into a single platform.

This course introduces key principles and foundational concepts along with the core technologies of AlOps: big data and machine learning. The course will provide students with an understanding of how and why digital transformation, together with the evolution of machine learning, have brought about the rise of AlOps as an indispensable tool in today's IT Operational landscape.

Core technologies of machine learning and big data will be discussed, as well as the basic concepts of artificial intelligence, different types of machine learning models that can be implemented, and the relationship between AlOps and MLOps, DevOps and Site Reliability.

This foundation course will also provide the student with a solid understanding of the benefits of implementing AlOps in the organization, including common challenges and key steps in ensuring valuable and successful integration of artificial intelligence in the day to day operations of information technology solutions.

Unique and exciting exercises will be used to apply the concepts covered in the course and sample documents, templates, tools, and techniques will be provided to use after the class.

This course positions learners to successfully complete the AlOps Foundation certification exam.

COURSE OBJECTIVES

At the end of the course, the following learning objectives are expected to be achieved:

- Clear understanding of the history, origins and current developments of AlOps
- Define and comprehend basic concepts and key principles within AlOps
- Understand general concepts of big data and artificial intelligence, and how they relate to AlOps
- Recognize the relationship between AlOps and MLOps

www.compendium.pl strona 1 z 5

- Understand the effectiveness of AlOps deployment and possible benefits
- Understand the changes in mindset, collaboration and skills for AlOps to be applied in the organization
- Quantify outcomes of an AIOps implementation leveraging industry standard metrics
- Understand usual challenges and opportunities of applying AlOps in the organization
- Visualize the challenges, trends and ethical considerations organizations might face while deploying an AlOps initiative

AUDIENCE

The target audience for the AlOps Foundation course are professionals including:

- Anyone focused on IT Operations
- Anyone interested in software in today's IT landscape
- AIOps Architects and Engineers
- Business Managers, Stakeholders
- Cloud Engineers
- Data Engineers and Scientists
- DevOps Engineers and Practitioners
- IT Directors
- IT Managers
- IT Security Analysts
- IT Team Leaders
- Product Owners
- Scrum Masters
- Software Engineers
- Site Reliability Engineers
- System Integrators
- AIOps Platform and Tool Providers

Plan szkolenia:

- Module 1: AlOps Foundation
 - History and Predecessors
 - Meaning of AlOps
 - Differences between AlOps and IT Operations Analytics

www.compendium.pl strona 2 z 5

- Core Technologies and Basic Concepts
- Stages of an AlOps System
- Overlapping Practices
- Module 2: AlOps in the Organization
 - Drivers and Influences
 - AIOps and DevOps
 - AlOps and Site Reliability
 - AlOps and Security
 - Data, Telemetry and Systems Complexity
 - A New Paradigm to Understand System State
- Module 3: Core Technologies: Data
 - What is Big Data?
 - ∘ The Five V's of Big Data
 - Characteristics of Big Data
 - AlOps Data Sources and Types
 - Diverse Data
- Module 4: Core Technologies: Machine Learning (ML)
 - Al and Machine Learning
 - Supervised vs Unsupervised
 - Machine Learning vs Analytics
 - Machine Learning and Training Models
 - AlOps and the Future of Al
 - AlOps vs. Analytics Similarities and Differences
- Module 5: AIOPs and Operations Metrics
 - Metrics and Operations
 - Key Metrics to Track Across Systems
 - Agreements, Objectives and Indicators
 - Incident Related Metrics
 - Quantifying Incidents (MTTD, MTBF, MTTA, MTTR)
 - Service Level Agreements
- Module 6: AlOps Use Cases and Organizational Mindset
 - Shifting from Reactive to Proactive
 - Characteristics of a Reactive Approach to Operations
 - Deterministic to Probabilistic
 - Deep Dive Into Use Cases
 - AlOps and Shifts in the Organization

www.compendium.pl strona 3 z 5

- Understanding the Past and Predicting the Future
- Module 7: Evaluating AIOps Impact
 - AlOps and Operations Metrics
 - AlOps, DevOps and SRE
 - Improving Al Accuracy
 - AlOps System Visibility
 - Tracking Impact of AIOps
 - Impact to Incident Related Metrics
 - AlOps and DORA Metrics
- Module 8: Implementing AIOps in the Organization
 - Avoiding Common Challenges
 - Ethics and Machine Learning
 - Paths to Implementation
 - Data Quality and Processes
 - Culture and Organizational Practices
 - Data and Regulation
 - Machine Learning Bias
 - Privacy and User Data

Wymagania:

Familiarity with IT terminology and IT related work experience are recommended.

Poziom trudności

Certyfikaty:

Each participant receives a confirmation of completion an accredited training.

Successfully passing (65%) the 60-minute examination, consisting of 40 multiple-choice questions, leads to the AlOps Foundation certificate. The certification is governed and maintained by DevOps Institute, a member of the PeopleCert Group.

Prowadzący:

Authorized PeopleCert Trainer

Informacje dodatkowe:

LEARNER MATERIALS

- $\circ\,$ Sixteen (16) hours of instructor-led training and discussion facilitation
- Participation in unique exercises designed to apply concepts
- o Sample documents, templates, tools and techniques
- Sample exam
- o Glossary
- Access to additional value-added resources and communities
