

Szkolenie: Micro Focus CP300 - Control Point Installation Essentials

Cel szkolenia:

This one-day Administrator-level course provides the essential knowledge to enable participants to install and maintain Micro Focus ControlPoint (CP) software, including considerations for configuring and managing the ControlPoint technical environment, using the ControlPoint interface, policy and repository definition, and data analysis.

Class sizes are limited to 12 participants to provide adequate individual attention under the guidance of expert Micro Focus Education trainers. During this course, learners will participate in guided demonstrations followed by self-completed exercises. It is important to complete all demonstrations and exercises because the course builds upon itself.

Upon successful completion of this course, you should be able to:

- Explain Information Governance and the role that Micro Focus ControlPoint (CP) plays in it
- List the CP pre-installation requirements
- Install and configure the prerequisites
- Identify the architecture of ControlPoint
- Install ControlPoint
- Explain the ControlPoint interface and features
- Explain ControlPoint security

Audience/Job Roles

This course is intended for:

- IT Administrators, Content Managers, Administrators
- Users who are responsible for the installation and initial design of ControlPoint, including, but not limited to, Senior Business Staff, Power Users, and/or Core Project Team Members.
