

Szkolenie: Extreme Networks Extreme Switching - Advanced Configuration

Cel szkolenia:

Students will learn methods to enhance their existing switching and routing environment with security, traffic optimization, automation, and integration features. Several network management tasks will be exercised. This knowledge will be reinforced through actual hands-on experience with networking equipment in a lab environment, where students will perform real world tasks.

Course Objectives

Upon completion of this course, students will have gained the working knowledge to:

- Implement security mechanisms in ExtremeXOS/SwitchEngine devices, such as ONEPolicy or ACLs
- Implement traffic optimization techniques e.g., Quality of Service
- Automate, integrate, and enhance ExtremeXOS/SwitchEngine capabilities with features such as Fabric Attach, CLI scripting as well as Python scripting and Python processes
- Earn a learning credential on the Professional Programme training path

Who Should Attend

This course is designed as an optimization-oriented knowledge enhancement and is aimed at individuals who are responsible for the deployment and maintenance of the Extreme Networks family of ExtremeXOS/SwitchEngine switches.

Plan szkolenia:

- Security
 - EXOS Security Overview
 - Authentication, Authorization and Accounting
 - Access Control Lists
 - Policy
- Optimization
 - Traffic Optimization
 - Automation
 - Fabric Attach

- Application Telemetry
- Integrated Application Hosting

Wymagania:

You must be certified in [Extreme Switching - Installation and Configuration](#)

Poziom trudności

Certyfikaty:

The participants will obtain certificates signed by Extreme Networks.

Prowadzący:

Authorized Extreme Networks Trainer.
