Cel szkolenia:

In this course, you will learn how to deploy, configure, and secure FortiAnalyzer. You will also learn how to register and manage devices with FortiAnalyzer. Finally, you will explore the fundamentals of the logging and reporting management capabilities included in FortiAnalyzer. These skills will provide you with a solid foundation for becoming a professional FortiAnalyzer administrator.

After completing this course, you will be able to:

- Describe the purpose of FortiAnalyzer
- Describe the FortiAnalyzer operating modes
- Understand logging in a Fortinet Security Fabric environment
- Describe FortiAnalyzer Fabric
- Manage administrative domains (ADOMs)
- Configure network settings
- Configure secure administrative access
- Manage the disk quota
- Perform a system configuration backup
- Manage RAID
- Manage HA
- Register and manage devices
- Describe the log file workflow

- Perform log backups
- Understand Fabric connectors
- Configure log redundancy and encryption
- Configure log rollover and retention policy
- Manage reports

Who Should Attend

Anyone who is responsible for the day-to-day management of FortiAnalyzer devices should attend this course.

Plan szkolenia:

- Introduction and Initial Configuration
- Administration and Management
- RAID and HA
- Device Management
- Logs and Reports Management

Wymagania:

Familiarity with all topics presented in the FortiGate Security and FortiGate Infrastructure courses.

Poziom trudności
