Kraków - ul. Tatarska 5, II piętro, godz. 9:00 - 16:00

Warszawa - ul. Bielska 17, godz. 9:00 - 16:00

## DOSTĘPNE TERMINY

2019-05-29 | 2 dni | Warszawa

2019-05-29 | 2 dni | Warszawa

## Cel szkolenia:

**Enterprise Service Bus (ESB) Deployment with Red Hat® JBoss® Fuse** is a hands-on course that gives System Administrators and Java™ developers an understanding of Red Hat JBoss Fuse, a commercially supported distribution of Apache ServiceMix. Attendees will learn the skills required to manage, deploy, and customize Red Hat JBoss Fuse and develop the core concepts of OSGi-based application using Red Hat JBoss Fuse's features, including:

- Bundle management
- Server management
- Deployment via Fuse Fabric, Hawt.io, and Red Hat JBoss Developer Studio

## Audience for this course:

- Red Hat JBoss Fuse administrators and developers who need to learn how to install, configure, manage and deploy OSGi-compliant applications.

## Plan szkolenia:

- Install and customize Red Hat JBoss Fuse
  - Locate, install, and familiarize yourself with Red Hat JBoss Fuse customizations.
- Manage Red Hat JBoss Fuse

- Use command line to exercise many subsystems of JBoss Fuse.
- Implement OSGi in production
  - Identify the concerns OSGi addresses and how Red Hat JBoss Fuse solves for these concerns to improve development productivity.
- Understand Fuse Application Bundles
  - Understand the differences and benefits between OSGi bundles and Fuse Application Bundles.
- Manage Red Hat JBoss Fuse in large deployment scenarios
  - Create, customize, and deploy new servers for a production environment.
- Implement security in Red Hat JBoss Fuse
  - Customize Red Hat JBoss Fuse to deploy a secure environment for management.
- Fabric in Red Hat JBoss Fuse
  - Understand enterprise management of Red Hat JBoss Fuse-based integration solutions.
- Developing with Red Hat JBoss Developer Studio
  - Understand the advantages of using Red Hat JBoss Developer Studio with the integration stack to improve developers' productivity.

## Wymagania:

- Java EE application server administration knowledge
- Experience with tools such as Maven or Ant
- Basic Camel knowledge

## Poziom trudności

## Certyfikaty:

Uczestnicy szkolenia otrzymują **certyfikat** sygnowany przez firmę **Red Hat**.

## Prowadzący:

Red Hat Certified Instructor.
