

Szkolenie: AWS
Advanced Developing on AWS with AWS Jam

DOSTĘPNE TERMINY

2025-05-13 | 4 dni | Virtual Classroom

2025-06-10 | 4 dni | Virtual Classroom

Cel szkolenia:

The Advanced Developing on AWS course uses the real-world scenario of taking a legacy, on-premises monolithic application and refactoring it into a serverless microservices architecture. This four-day advanced course covers advanced development topics such as architecting for a cloud-native environment; deconstructing on-premises, legacy applications and repackaging them into cloud-based, cloud native architectures; and applying the tenets of the Twelve-Factor Application methodology.

The final day is an AWS Jam, a gamified event, with teams competing to score points by completing a series of challenges according to established best practices based on concepts covered in the course. You get to experience a wide range of AWS services in a series of real-world scenarios that represent common operational and troubleshooting tasks. The end result is developing, enhancing, and validating your skillsets in the AWS Cloud through real-world problem solving, exploring new services, features, and understanding how they interoperate.

Activities

This course includes presentations, group exercises, hands-on labs, and team-based gamified challenge

Course objectives

In this course, you will:

- Analyze a monolithic application architecture to determine logical or programmatic break points where the application can be broken up across different AWS services
- Apply Twelve-Factor Application manifesto concepts and steps while migrating from a monolithic architecture
- Recommend the appropriate AWS services to develop a microservices based cloud-native application
- Use the AWS API, CLI, and SDKs to monitor and manage AWS services
- Migrate a monolithic application to a microservices application using the 6 Rs of migration
- Explain the SysOps and DevOps interdependencies necessary to deploy a microservices

application in AWS

- Work in a team environment to solve real AWS use-case challenges in an AWS Jam

Intended audience

This course is intended for experienced software developers who are already familiar with AWS services.

Plan szkolenia:

- Day 1
 - Module 1: The cloud journey
 - Common off-cloud architecture
 - Introduction to Cloud Air
 - Monolithic architecture
 - Migration to the cloud
 - Guardrails
 - The six R's of migration
 - The Twelve-Factor Application Methodology
 - Architectural styles and patterns
 - Overview of AWS Services
 - Interfacing with AWS Services
 - Authentication
 - Infrastructure as code and Elastic Beanstalk
 - Demonstration: Walk through creating base infrastructure with AWS CloudFormation in the AWS console
 - Hands-on lab 1: Deploy your monolith application using AWS Elastic Beanstalk
 - Module 2: Gaining Agility
 - DevOps
 - CI/CD
 - Application configuration
 - Secrets management
 - CI/CD Services in AWS
 - Demonstration: Demo AWS Secrets Manager
- Day 2
 - Module 3: Monolith to MicroServices
 - Microservices
 - Serverless

- A look at Cloud Air
- Microservices using Lambda and API Gateway
- SAM
- Strangling the Monolith
- Hands-on lab: Using AWS Lambda to develop microservices
- Module 4: Polyglot Persistence & Distributed Complexity
 - Polyglot persistence
 - DynamoDB best practices
 - Distributed complexity
 - Step functions
- Day 3
 - Module 5: Resilience and Scale
 - Decentralized data stores
 - Amazon SQS
 - Amazon SNS
 - Amazon Kinesis Streams
 - AWS IoT Message Broker
 - Serverless event bus
 - Event sourcing and CQRS
 - Designing for resilience in the cloud
 - Hands-on lab: Exploring the AWS messaging options
 - Module 6: Security and Observability
 - Serverless Compute with AWS Lambda
 - Authentication with Amazon Cognito
 - Debugging and traceability
 - Hands-on lab: Developing microservices on AWS
 - Hands-on lab 8: Automating deployments with Cloud Formation
- Day 4
 - AWS Jam
 - Participate in team based challenges in a real AWS environment
 - Compete with your colleagues in a gamified, hands-on learning experience
 - Apply your learning from the course on various AWS services

Wymagania:

We recommend that attendees of this course have:

- In-depth knowledge of at least one high-level programming language
- Working knowledge of core AWS services and public cloud implementation
- Completion of the Developing on AWS classroom training, and then a minimum of 6 months of application of those concepts in a real world environment

Poziom trudności

Certyfikaty:

The participants will obtain certificates signed by AWS (course completion).

Prowadzący:

AWS Authorized Instructor (AAI)
