Cel szkolenia:

Up to 200 times faster software deployment, 30 times increased deployment frequency, and 60 times higher change success rates. The data doesn’t lie. Organizations such as Netflix, Spotify and Facebook are transforming IT by successfully implementing DevOps principles. But you don’t have to be a hot internet company or a gigantic enterprise to be a DevOps leader. Companies large and small, young and old, have magnificently made the transition and have the proof of success in their pockets.

DevOps training is the starting point for an organization going on the DevOps journey. Improved workflows and faster deployment start with a core understanding of DevOps fundamental concepts by anyone involved in an agile and/or DevOps team. The 3-day DevOps Fundamentals course provides an extensive introduction to the core Agile DevOps principles covering the essential knowledge and skill competencies that have been defined by the DevOps Agile Skills Association (DASA). This course is designed to provide the core education necessary to build your DevOps vocabulary and to understand its principles and practices. With the help of key DevOps concepts and terminology, real-life case studies, examples and interactive group discussions and extensive exercises in each module you will acquire a fundamental understanding of DevOps.
At the end of this course, you will be able to:

- Know the emergence of DevOps
- Know the core concepts and principles of DevOps
- Know what DevOps means for you as professional and for your organization
- Know the essence of a DevOps culture
- Understand the key elements of a DevOps culture
- Know the important aspects when creating a DevOps culture
- Know the Operational models of DevOps
- Understand the need for autonomous teams
- Understand the impact of DevOps on Architecture with respect to deployment
- Understand governance within DevOps teams
- Understand Agile, Scrum and Kanban and how these practices relate to one another
- Understand how ITSM processes relate to practices in a DevOps culture
- Understand how lean is used to optimise processes
- Know how to provide a Value Stream Map for a given process
- Understand the way to harvest new and innovative ideas
- Know the impact of automation on Software Delivery processes
- Understand the benefits and core principles of Continuous Delivery
- Describe the key cloud principles for DevOps organisations
- Know the relevance of monitoring and logging DevOps
