Cel szkolenia:

PRINCE2 Agile™ is the world's most complete agile project management solution, combining the flexibility and responsiveness of agile with the clearly defined framework of **PRINCE2®**. As with PRINCE2®, PRINCE2 Agile™ can be applied to any type of project within any industry sector. PRINCE2 Agile™ is an extension module tailored for forward-thinking organizations and individuals already benefiting from PRINCE2. It provides further guidance on how to apply agile methods to the world's most recognized project management method. PRINCE2 Agile™ has been developed to help experienced PRINCE2® practitioners tailor management controls for agile development, while helping 'agilistas' understand PRINCE2® governance requirements.

Following the completion of the course delegates will be able to:

- Understand the basic concepts of common agile ways of working
- Understand the purpose and context for combining PRINCE2® and the agile way of working
- Be able to apply and evaluate the focus areas to a project in an agile context
- Be able to fix and flex the six aspects of a project in an agile context
- Be able to apply or tailor the PRINCE2® principles, themes, processes and management products to a project in an agile context
- To learn through the use of theory and practical exercises
- To prepare delegates for the **PRINCE2 Agile™ Practitioner exam**

The course comprises a mixture of input sessions and group exercises. All delegates are encouraged to actively participate during the practical sessions to gain the full benefit during the training. During the course, delegates will undertake a number of mock examinations and gain feedback on the progress towards eventual success. To prepare effectively for the **PRINCE2 Agile™ Practitioner exam**.
