Cel szkolenia:

ITIL® is comprised of five core publications: Service Strategy (SS), Service Design (SD), Service Transition (ST), Service Operations (SO) and Continual Service Improvement (CSI). It promotes alignment with the business as well as improvement in operational efficiency. The official ITIL® qualification scheme, owned by AXELOS, describes two streams, the Service Lifecycle Stream and the Service Capability stream:

- The Service Lifecycle stream focuses on ITIL® practices within the Service Lifecycle context. The primary focus is the Lifecycle itself as well as the processes and practice elements used within it.
- The Service Capability stream is for those who wish to obtain an in depth understanding of specific ITIL® processes and roles. The primary focus is on process activities, process execution and use throughout the IT Service Lifecycle.

The ITIL® SS (Service Strategy) course is part of the ITIL® Intermediate Lifecycle stream. The
course prepares candidates to take the ITIL® Service Strategy Intermediate exam as well as providing valuable knowledge that can be implemented in the workplace. The Service Strategy Certificate is a free-standing qualification but is also part of the ITIL® Intermediate Lifecycle stream. It is one of the modules that leads to the ITIL® Expert Certificate in IT Service Management (ITSM). The purpose of this module, exam and certificate is, to impart, test, and validate the knowledge on industry practices in IT Service Management as documented in the ITIL® Service Strategy publication.

This qualification provides a complete management-level overview of Service Strategy including all its related activities: how to design, develop, and implement service management not only as an organizational capability but also as a strategic asset. Candidates can expect to gain competencies in the following:

An interactive approach is used combining lecture, discussion and case study experience to prepare participants for the ITIL® Intermediate Service Strategy certification exam as well as providing valuable practical knowledge that can be applied in the workplace immediately.
