Cel szkolenia:

ITIL® is comprised of five core publications: Service Strategy (SS), Service Design (SD), Service Transition (ST), Service Operations (SO) and Continual Service Improvement (CSI). It promotes alignment with the business as well as improvement in operational efficiency. The official ITIL® qualification scheme, owned by AXELOS, describes two streams, the Service Lifecycle Stream and the Service Capability stream:

- The Service Lifecycle stream focuses on ITIL® practices within the Service Lifecycle context. The primary focus is the Lifecycle itself as well as the processes and practice elements used within it.
- The Service Capability stream is for those who wish to obtain an in depth understanding of specific ITIL® processes and roles. The primary focus is on process activities, process execution
and use throughout the IT Service Lifecycle.

The **ITIL® ST (Service Transition)** course is part of the ITIL® Intermediate Lifecycle Stream. The course prepares candidates to take the **ITIL® Service Transition Intermediate exam** as well as providing valuable knowledge that can be implemented in the workplace. The **Service Transition Certificate** is a free-standing qualification but is also part of the ITIL® Intermediate Lifecycle Stream. It is one of the modules that leads to the **ITIL® Expert Certificate in IT Service Management (ITSM)**. The purpose of this module, exam and certificate is, to impart, test, and validate the knowledge on industry practices in **IT Service Management** as documented in the **ITIL® Service Transition** publication.

This qualification provides a complete management-level overview of **Service Transition** including all its related activities. Candidates can expect to gain competencies in the following:

- Introduction to service transition
- Service Transition principles
- Service Transition processes
- Managing people through service transitions
- Organizing for Service Transition
- Technology considerations
- Implementing and improving service transition
- Challenges, critical success factors and risks.

In addition, the training for this certification includes examination preparation, and a mock examination.

This lifecycle stage focuses on organizing and maintaining Service Transition. Participants will learn the principles and core elements along with the activities and technology & implementation considerations within this stage of the Service Lifecycle. An interactive approach is used combining lecture, discussion and case study experience to prepare participants for the **ITIL® Intermediate Service Transition certification exam** as well as providing valuable practical knowledge that can be rapidly applied in the workplace. The integrated case study deepens the participant’s appreciation of how ITIL® best practices can be applied in order to improve IT performance. Practical assignments are used throughout the course to enhance the learning experience.

**Plan szkolenia:**

- **COURSE INTRODUCTION**
  - Service Transition -Introduction
  - Purpose and objectives
  - Scope of Service Transition
  - Service Transition Processes
  - Value to the Business
○ Context of Service Transition
○ Service Transition Inputs and outputs
○ The ITIL® Certification scheme
○ The exam format

◊ PRINCIPLES
○ Service Transition Contents
○ Principles & Policies
○ Best Practices
○ Optimizing Service Transition
○ Metrics for alignment with Business and IT plans
○ Metrics for Service Transition

◊ PROCESSES
○ Transition planning and support
○ Change Management
○ Service Asset and Configuration Management
○ Release and Deployment Management
○ Service Validation and Testing
○ Service Evaluation

◊ ACTIVITIES
○ Communication
○ Organizational Change
○ Organizational Change Products
○ Planning / Implementing Change
○ Resistance to Change
○ Stakeholder Management

◊ ROLES AND RESPONSIBILITIES
○ Introduction
○ Process Owner
○ Service Owner
○ Organizational context
○ Relationships with other Lifecycle stages
○ Key roles and responsibilities

◊ TECHNOLOGY CONSIDERATIONS
○ Considerations of Technology
○ Service Transition Support Tools
○ ITSM Technology
Knowledge Management Tools
Collaboration - Communities and Workflow Management
Configuration Management System

IMPLEMENTATION AND IMPROVEMENT
Justifying Service Transition
Designing Service Transition
Introducing Service Transition
Cultural Change
Risks and Value
Implementation Challenges, CSF's and Risks
Service Transition under difficult circumstances
Integrated Service Transition processes
Service Transition in a virtual cloud environment

APPENDICES
Business case study and exercises
Sample Exams
Glossary & Acronyms
Feedback
Recap

Wymagania:

An ITIL® Foundation certificate and preferably two years work experience in an IT Service Management environment.

Poziom trudności

Certyfikaty:

Prowadzący:

Authorized PEOPLECERT Trainer.
