Cel szkolenia:

This course provides an understanding of basic concepts and skills necessary to configure Check Point vSEC products for use in Microsoft Azure.

WHO SHOULD ATTEND?

Technical professionals who support, install, deploy or administer Check Point Software Blades.

COURSE OBJECTIVES AND TOPICS INCLUDE:

- Create navigation shortcuts in the Microsoft Azure Portal.
- Navigate various products in the Microsoft Azure Portal.
- Create an Azure virtual network.
- Configure a private subnet for the virtual network.
- Deploy and configure a Check Point R80 management server.
- Deploy and configure a Check Point vSEC cluster.
- Create a web server and an associated route table.
- Configure routes in the route table.
- Understand cloud computing and the advantages of deploying resources into a virtualized datacenter.
- Discuss the various security challenges facing virtual environments and datacenters.

- Understand how Check Point vSEC protects virtual environments and datacenters.
- Understand how Microsoft Azure products and services can be used to build a virtual environment secured by Check Point vSEC.
- Understand how to plan and deploy a Microsoft Azure virtual network.
- Recognize the two elastic licensing options for Microsoft Azure.
- Configure cluster and web server objects to represent your Azure network in SmartConsole.
- Configure the policy to NAT traffic to the web server.

Plan szkolenia:

- Check Point vSEC Security Solution
- Microsoft Azure
- Azure Deployment and Licensing

Lab exercises:

- Navigating Azure
- Building the Azure Environment
- Configuring Policy in SmartConsole

Wymagania:

Persons attending this course should have a:

- CCSA
- Basic knowledge of networking
- 6 months to 1 year of experience with Check Point products recommended

Poziom trudności

Certyfikaty:

The participants will obtain certificates signed by Check Point Software Technologies Ltd. (course completion).

Prowadzący:

Authorized Check Point Software Technologies Ltd. Trainer.
