Cel szkolenia:

This course is designed to introduce the new features, functionality and procedures for administering **SUSE Linux Enterprise 15**.

Attendees will learn how SLE 15 differs from previous versions of **SUSE Linux Enterprise**, and how those changes will affect the way it is deployed and used.

Attendees will be taught introduced to the following changes to SLE 15:

- Installation and AutoYaST changes
- Infrastructure changes including chrony and firewalld
- Core changes to the Linux kernel, OpenSSL and libstorage
- Changes for developers: SDK, GCC7 and scripting languages
- Additional changes to the OS
- Upgrading to SLE 15 from previous versions

Audience Summary:

This course is designed for **SUSE Linux Enterprise administrators** who have worked with previous versions, the main focus being the transition from SLE 12 to SLE 15.

Plan szkolenia:

- Introduction to SLE 15
 - Evolution of Operating Systems
 - Multimodal
 - Unified Installer
 - Modular+
 - Package Handling
 - chrony
 - firewalld
- Installation Changes
 - Unified Installer
 - Extensions and Modules
 - AutoYaST
- Infrastructure Changes
 - chrony
 - Firewalld
- Core Changes
 - Linux Kernel 4.12
 - openssl 1.1
 - Wayland
 - YaST Partitioner
- Changes for Developers
 - SDK
 - Scripting Language Versions
 - Wayland
 - YaST Partitioner
- Additional Changes
 - Repository Management Tool (RMT)
 - Miscellaneous Changes
- Upgrade Paths and Methods
 - Available Upgrade Paths
 - SLE 15 Product Life Cycle
 - Preparing for an Upgrade

Wymagania:

This course is designed for students with previous **SUSE Linux Enterprise Server** experience equivalent to [SLE201 SUSE Linux Enterprise Server 12 Administration](#), although intermediate experience with any Linux distribution will be sufficient.

Poziom trudności

Certyfikaty:

The participants will obtain **certificates** signed by **SUSE**.

Prowadzący:

Certified SUSE Trainer.
