Cel szkolenia:

In this 2-day course, participants will learn the following:

- How to protect their organization and improve its security against advance threats that bypass traditional security controls
- How FortiSandbox detects threats that traditional antivirus product miss
- How FortiSandbox dynamically generates local threat intelligence, which can be shared throughout the network
- How other advanced threat protection (ATP) components—FortiGate, FortiMail, FortiWeb, and FortiClient—leverage this threat intelligence information to protect organizations, from end-to-end, from advanced threats

Course is based on the FortiSandbox version 2.5

After completing this course, you should be able to:

- Identify different types of cyber attacks
- Identify threat actors and their motivations
- Understand the anatomy of an attack—the kill chain
- Identify the potentially vulnerable entry points in an Enterprise network
- Identify how the ATP framework works to break the kill chain
