## LOKALIZACJE

Kraków - ul. Tatarska 5, II piętro, godz. 9:00 - 16:00

Warszawa - ul. Bielska 17, godz. 9:00 - 16:00

## Cel szkolenia:

Course is based on SUSE Enterprise Storage version 5.

**SES211 SUSE Enterprise Storage 5 Deployment** course teaches students how to prepare for and execute a competent and successful deployment of **SUSE Enterprise Storage** using standard tools, methods, and best practices. The course assumes that students have a basic understanding of **Ceph storage**, the **RADOS cluster** and typical configuration details.

In this course, attendees will learn the following:

- Understand the requirements to plan and prepare for a successful SES 5 deployment using **DeepSea**
- Understand the capabilities of Salt that pertain to **DeepSea**
- Learn about **Software Defined Storage** concepts and considerations
- Understand the details of the 5 Stages of deployment using **DeepSea**
- Investigate detailed troubleshooting approaches to aid successful deployment

## Plan szkolenia:

- Introduction
- SES 5 Overview
- Salt Primer for DeepSea Administrators
- Introduction to DeepSea
- Deployment Considerations
- Deploying with DeepSea

- openATTIC and DeepSea
- DeepSea Services Stage (Stage 4)
- DeepSea Removal Stage (Stage 5)

## Wymagania:

Attendees should have a working knowledge of SUSE Enterprise Storage (or other Ceph based cluster technologies) to the level required by SUSE Certified Administrator in Enterprise Storage.

## Poziom trudności

## Certyfikaty:

The participants will obtain **certificates** signed by **SUSE**.

## Prowadzący:

Certified SUSE Trainer.
