

Szkolenie: Huawei  
HCIP-Storage**DOSTĘPNE TERMINY**

2025-09-15 | 5 dni | Kraków / Virtual Classroom  
2025-09-22 | 5 dni | Warszawa / Wirtualna sala  
2025-10-20 | 5 dni | Warszawa / Virtual Classroom

**Cel szkolenia:**

Huawei Certified ICT Professional-Storage training and certifying senior engineers with capability of planning and design, deployment and implementation, management and O&M, as well as troubleshooting of storage systems.

**Objectives**

On completion of this program, the participants will be able to:

- Have a good command of the concepts and working principles of the Hyper and Smart series flash storage technologies
- Be familiar with the application scenarios and configuration methods of Hyper and Smart series technologies
- Master the process, content, and common tools of storage planning and design
- Be familiar with the installation and deployment of flash storage and distributed storage
- Be familiar with features, principles, application scenarios, and configuration processes of distributed storage technologies
- Be familiar with the product positioning, software and hardware architecture of various types of storage devices
- Have a good command of key features and typical application scenarios of storage products
- Have a good command of storage O&M operations
- Be familiar with the storage troubleshooting process and method

**Target Audience**

- Those who want to be storage engineer
- Those who want to achieve HCIP-Storage certification
- Administrator of storage array

## Plan szkolenia:

- Flash Storage Technology and Application
  - Hyper Series Technology and Application
    - Hyper series technologies concepts and application scenarios
    - Working principles and configuration methods
  - Smart Series Technology and Application
    - Smart series technologies concepts and application scenarios
    - Working principles and configuration methods
- Storage Design and Implementation
  - Storage Planning and Design
    - Planning and Design process, content and tools
  - Storage Installation and Deployment
    - Installation and deployment process of flash storage
    - Installation and deployment process of distributed storage
- Distributed Storage Technology and Application
  - Distributed Storage Technology and Application
    - Block service features
    - Object service features
    - HDFS service features
    - File service features
- Storage System Introduction
  - All-Flash Storage Introduction
    - All-Flash Storage product positioning
    - Hardware and software architectures
    - Key features and technical advantages
    - Typical application scenarios
  - Hybrid Flash Storage Introduction
    - Hybrid Flash Storage product positioning
    - Hardware and software architectures
    - Key features and technical advantages
    - Typical application scenarios
  - Distributed Storage Introduction
    - Distributed Storage product positioning
    - Hardware and software architectures
    - Key features and technical advantages

- Typical application scenarios
- Hyper-Converged Storage Introduction
  - Hyper-Converged Storage product positioning
  - Hardware and software architectures
  - Key features and technical advantages
  - Typical application scenarios
- Storage Maintenance and Troubleshooting
  - Storage Maintenance and Troubleshooting
    - Storage O&M methods
    - Troubleshooting process

## Wymagania:

We recommend that attendees of this course have:

- Completion of the Developing on HCIA-Storage classroom training.

## Poziom trudności

## Certyfikaty:

The participants will obtain certificates signed by Huawei (course completion).

This course also helps you prepare for the Huawei HCIP-Storage exam.

- Exam Code: H13-624
- Exam Type: Written examination
- Exam Format: Single-answer Question, Multiple-answer Question, True or false, Short Response Item, Drag and Drop Item
- Time: 90min
- Passing Score/Total Score: 600/1000

## Prowadzący:

Huawei Certified Trainer.
