

Training: Micro Focus IDM350 - Identity Manager Advanced Administration

TRAINING GOALS:

The purpose of this course is to enable Identity Manager Administrators to perform advanced administrative tasks using Identity Manager 4.7. The course provides instruction and hands-on experience with tasks such as installing Identity Manager Applications, configuring self-service password reset, using the User application, and creating a roles structure. In addition, students learn how to use the reporting module, access review with IDM, and customize the IDM Role Member report.

Upon successful completion of this course, you should be able to:

- Understand how to install Identity Manager Application
- Utilize the Self-Service Password Reset Application
- Identify Roles Structures
- Create Reports and Branding of Reports
- Customize the IDM Role Member

Audience/Job Roles

This course is designed for students who are have a basic Identity Manager administrative skill set and knowledge, and want to enhance their administrative skills.
