

Training: IBM Advanced Tools for AIX Performance Analysis

TRAINING GOALS:

Develop the skills to use kernel traces, trace based utilities, and symon to measure and analyze CPU, memory, and I/O performance issues on IBM systems running AIX. Reinforce each lecture during extensive hands-on lab exercises and get practical experience applicable to their performance management requirements.

- $\circ\,$ Use the trace facility to collect data and create a trace report
- $\circ\,$ Use the kernel trace facilities to analyze CPU performance issues
- $\circ\,$ Describe causes and impacts of high context switching rates
- $\circ~$ Identify what causes a thread to be blocked and later woken up
- $\circ~$ Explain the relationship between the output of svmon -G, svmon -P, and svmon -S
- · Calculate the amount of memory in use on the system
- $\circ~$ Explain the relationship between symon, ymstat, and ipcs output
- $\circ\,$ Categorize the memory in use on the system by segment type
- $\circ~$ Identify which processes are using the most memory or paging space
- \circ Describe the characteristics of asynchronous I/O, synchronous I/O, direct I/O, and concurrent I/O
- $\circ~$ Identify if the expected type of I/O is being executed
- Tune asynchronous I/O

The audience for this training includes AIX technical support personnel, performance benchmark personnel, and AIX system administrators.

CONSPECT:

Day 1

- Welcome
- Unit 1: AIX trace facilities
- Exercise 1: AIX trace facilities
- Unit 2: Advanced memory topics I
- Exercise 1: AIX trace facilities (Part 3)
- Exercise 2: Advanced memory topics I

www.compendium.pl

Day 2

- Unit 3: Advanced memory topics II
- Exercise 3: Advanced memory tropics II
- Unit 4: Advanced CPU topics I
- Exercise 4: Advanced CPU topics I
- Optional) Exercise 4: Advanced CPU topics I (Part 2)

Day 3

- Unit 5: Advanced CPU topics II
- Exercise 5: Advanced CPU topics II
- Unit 6: Advanced I/O topics I
- Exercise 6: Advanced I/O topics I (Part 1)
- Optional) Exercise 5: Advanced CPU topics II
- $\circ~$ (Parts 2 and 3)

Day 4

- Exercise 6: Advanced I/O topics I (Part 2)
- Unit 7: Advanced I/O topics II
- Exercise 7: Advanced I/O topics II
- (Optional) Exercise 7: Advanced I/O topics II (Part 3)

REQUIREMENTS:

You are expected to have extensive AIX skills. These skills can be obtained by attending the following courses:

 $\circ\,$ AIX Power Systems for AIX IV: Performance Management (AN510) ${\rm or}$ have the equivalent extensive AIX skills

Difficulty level
