

TRAINING GOALS:

ISO/IEC 27002 Introduction training course introduces participants to information security controls of ISO/IEC 27002.

Course Objectives

By the end of this training course, the participants will be able to:

- Explain the main concepts of information security, cybersecurity, and privacy based on ISO/IEC 27002
- Identify the ISO/IEC 27002 controls for treating information security risks

Why Should You Attend?

ISO/IEC 27002 Introduction training course enables participants to understand the categorization of information security controls outlined in ISO/IEC 27002. The training course provides information on fundamental concepts of information security, cybersecurity, and privacy and the ISO/IEC 27002 standard structure.

By attending the ISO/IEC 27002 Introduction training course, you will understand the importance of an information security management system (ISMS) and the benefits of implementing information security controls based on ISO/IEC 27002.

Who Should Attend?

This training course is intended for:

- Managers or consultants engaged in information security management
- Individuals seeking to gain knowledge about the information security controls of ISO/IEC 27002
- Individuals wishing to pursue a career in information security

CONSPECT:

- Introduction to information security controls of ISO/IEC 27002

REQUIREMENTS:

There are no prerequisites to participate in this training course.

Difficulty level

CERTIFICATE:

The participants will obtain certificates signed by PECB (course completion).

TRAINER:

Authorized PEBC Trainer.

ADDITIONAL INFORMATION:

- Participants will be provided with training course materials containing over 100 pages of information and practical examples.
- An attestation of course completion worth 7 CPD (Continuing Professional Development) credits will be issued to the participants who have attended the training course.
