Training: The Linux Foundation
LFCS Linux Foundation Certified System Administrator

TRAINING GOALS:

The **Linux Foundation Certified System Administrator** exam is ideal for candidates looking to validate their Linux system administration skill set.

Overview

The LFCS Linux Foundation Certified System Administrator certification is ideal for candidates early in their Linux system administration or open source career. The exam consists of performance-based items that simulate on-the-job tasks and scenarios faced by sysadmins in the real world. Obtaining certification allows individuals to validate their skills to prospective employers, which is particularly valuable if you have little on-the-job experience.

There are no pre-requisites for this exam.

Exam Delivery: Online

Duration of Exam: 2 Hours

Certification Valid: 3 Years

Includes:

- 12 Month Exam Eligibility
- Free Exam Retake
- PDF Certificate

Domains & Competencies

The Linux Foundation worked with industry experts and the Linux kernel community to identify the core domains and the critical skills, knowledge and competencies applicable to each certification. Performance-based exams were then developed based on the competencies that were identified.
