

Training: Micro Focus AM350 - Asset Manager Tailoring

TRAINING GOALS:

This five-day, instructor-led training is designed to provide the tailoring skills and knowledge needed to implement and administer Asset Manager, navigate Asset Manager's core tables, and tailor and customize tables, screens, and pages for both the Web client and the Windows client. These skills assist administrators in their ability to implement an asset management solution in an enterprise-level business or large organization. The class consists of approximately 50% lecture and 50% hands-on lab exercises.

This course is designed for users who are proficient in Asset Manager.

Upon successful completion of this course, you should be able to:

- Describe the Asset Manager user interface (UI)
- Describe Application Designer
- List the database components
- Customize screens and pages
- Create overflow tables
- Manage your database
- Use Application Designer to archive data
- Describe actions
- Create business home pages
- Use wizards
- Create workflows
- Use workflows
- Use Asset Manager tables in workflows
- Configure workflows
- Troubleshoot common workflow implementation problems

Audience/Job Roles

- Customers – Administrators, developers, web developers, and managers who are managing the Asset Manager 9.x product
- Channel Partners and C&I personnel – Consultants, system architects, integrators, and planners who help customers with Asset Manager 9.x implementations

- Engineers – Personnel who provide pre-sales and post-sales support for Asset Manager 9.x

CONSPECT:

- Database Customizations
 - Describe the Asset Manager UI
 - Describe Application Designer
 - Describe the database components
 - Customize screens and pages
 - Create overflow tables
- Database Administration
 - Manage databases by:
 - Copying a database
 - Exporting/importing structure and data
 - Integrating a customization
