TRAINING GOALS:

In this course, you will learn the fundamentals of using FortiManager for the centralized network administration of many FortiGate devices.

In interactive labs, you will explore deployment strategies, which include single or multiple ADOMs, device registration, policy packages, shared objects, installing configuration changes, provisioning FortiManager as a local FortiGuard distribution server, and troubleshooting the features that are critical to day-to-day use after you deploy FortiManager.

Objectives

After completing this course, you will be able to:

- Describe the key features and capabilities of FortiManager
- Understand FortiManager API and meta fields
- Deploy administrative domains (ADOMs) to support multiple customers on a single FortiManager
- Restrict concurrent ADOM access by using workspaces and workflow mode
- Use provisioning templates for device-level changes across many devices
- Identify the synchronization states and manage the revision history of managed devices
- Manage firewall policies across multiple FortiGate devices using policy packages with shared and dynamic objects
- Deploy policies and objects from the global ADOM to multiple ADOMs
- Understand the Fortinet Security Fabric with FortiManager
- Describe high-availability (HA), backup, and recovery options for FortiManager
- Manage the firmware of supported devices centrally

- Offer a local FortiGuard distribution server to your Fortinet devices
- Diagnose and troubleshoot import and installation issues

Who Should Attend

Anyone who is responsible for the day-to-day management of FortiGate security policies using the FortiManager platform should attend this course.

CONSPECT:

- Introduction and Initial Configuration
- Administration and Management
- Device Registration
- Device-Level Configuration and Installation
- Policy and Objects
- Global ADOM and Central Management
- Diagnostics and Troubleshooting
- Additional Configuration

REQUIREMENTS:

- Knowledge of firewall concepts in an IPv4 network
- Familiarity with all topics in the FCP - FortiGate Security and FCP - FortiGate Infrastructure courses
- Basic understanding of network management systems

Difficulty level

CERTIFICATE:

The participants will obtain certificates signed by Fortinet.

This course is intended also to help you prepare for the FCP – FortiManager Administrator exam. This exam is part of the FCP Network Security certification tracks:

- Fortinet Certified Professional - Network Security

FCP – FortiManager Administrator certification exam is a one of the steps required to gain the Fortinet Certified Professional (FCP) title. Fortinet certification exams are offered at Pearson Vue test centers worldwide. More information about Fortinet Certification Program on the
