

Training: Micro Focus
SBM300-SBM Advanced Designer

TRAINING GOALS:

This course provides the concepts and skills to design advanced SBM forms and process apps with complex workflows including orchestrations.

Upon successful completion of this course, you should be able to:

- Design process apps with complex workflow process control
- Use advanced form capabilities
- Customize pre-built process apps
- Use a Web service in an application
- Build a straightforward orchestration workflow

Audience/Job Roles

This course is intended for those who will design and build advanced SBM forms and process apps.

CONSPECT:

- Course Overview
 - Identify the daily classroom schedule and methodology
 - Review the course objectives
- Advanced Workflow Process Control
 - Describe requirements for working with multiple workflows
 - Describe techniques for establishing workflow interaction
 - Build a process app that tallies votes and automates action based on results
- Advanced Forms Techniques
 - Describe key concepts related to Form Design
 - Identify different methods for creating new forms
 - Create structure with container and cell controls
 - Create rich form interfaces using widgets
 - Describe the use of form actions
 - Describe the use of application variables in forms

- Use JavaScript to customize forms
- Using Web Services
 - Describe Web services
 - Add a Web service to an application
 - Use a Web service Action in an application workflow
 - Map data for the Web service
- Creating an Orchestration
 - Describe the purpose of an orchestration
 - Add an orchestration workflow
 - Add steps to the workflow
 - Map data inputs and outputs
 - Set target variables and expressions
- Customizing a Pre-Built Process App
 - Understand the Process Scenario
 - Analyze the SSM Incident Management Workflow
 - Choose the Application Elements to customize
 - Customize Data design in a pre-built process app
 - Customize Workflow design in a pre-built process app
 - Customize Visual design in a pre-built process app
 - Generate a Comparison report
 - Deploy and test your customized process app
- Course Summary and Glossary
 - Review Course Objectives
 - Review Glossary terms
 - Identify Online Resources

REQUIREMENTS:

This course assumes that you:

- Understand the business processes to be implemented
- Know how to create and administer process apps and orchestrations

The course that provides this foundational knowledge is:

- SBM 200 – Designer and Administrator

Difficulty level

CERTIFICATE:

The participants will obtain certificates signed by Micro Focus (course completion).

TRAINER:

Authorized Micro Focus Trainer.
