

Training: IBM

IMS Data Sharing

TRAINING GOALS:

Learn about Information Management System (IMS) data sharing capabilities. Examine how multiple IMS systems on different processors can access and update the same databases with complete integrity.

- o Define IMS subsystems, Internal Resource Lock Manager (IRLM), and coupling facilities to use IMS data sharing
- Design recovery procedures for failures in the data sharing environment
- Understand application design considerations with IMS data sharing
- Monitor the performance of a data sharing environment
- Explain IRLM and coupling facility roles in support of IMS data sharing

This is an advanced course for IMS system programmers and database administrators, who implement and manage IMS systems using data sharing.

CONSPECT:

- Introduction to Data Sharing
- Overview of Data Sharing Functions
- Locking
- Buffer invalidations and notifies
- Installation and definition
- Utilities
- Normal operation
- Recovery operations
- Monitoring and diagnostic tools
- Performance considerations
- Batch considerations
- Data sharing configurations and migration

REQUIREMENTS:

www.compendium.pl page 1 of 2

BNP Paribas Bank Polska S.A. EUR: PL 79 1600 1462 1853 6451 3000 0006 💌 USD: PL 52 1600 1462 1853 6451 3000 0007

You should complete:

- IMS Database Recovery Control (DBRC) and Data Sharing (CM201) or
- IMS Database Recovery Control (DBRC) and Data Sharing Web (CMW20)
- or have equivalent work experience

You should have working knowledge of IMS databases and the use of DBRC.
