MB-800T00 Microsoft Dynamics 365 Business Central Functional ConsultantGold
Microsoft Partner

TRAINING GOALS:

Built and optimized for small and medium businesses, Dynamics 365 Business Central is an application for companies that have outgrown their entry-level business applications. Growing businesses often outgrow their basic accounting software or legacy enterprise resource planning (ERP) systems that are unable to handle increased inventory and transactions, lack integration with other line-of-business systems, and have reporting limitations. Businesses are also challenged with the logistics of providing services that have more scalability, increased mobility, and availability in the cloud. With Business Central, you can manage your financials, automate and secure your supply chain, sell smarter, improve customer service and project performance, and optimize your operations.

After completing the course, students will be able to:

- Understand use cases for Business Central modules
- Set up Business Central
- Configure Financials

Audience profile:

A Dynamics 365 Business Central core Functional Consultant is responsible for implementing core application setup processes for small and medium businesses.
