Training: Mile2
C)HISSP - Certified Healthcare IS Security Practitioner

TRAINING GOALS:

The vendor-neutral Certified Healthcare Information Systems Security Practitioner certification course covers the skills and knowledge to implement the best IT Healthcare Practices, as well as, regulatory compliance and standards in the healthcare industry.

Because of growing industry regulations and privacy requirements in the healthcare industry, the Certified Healthcare Information Systems Security Practitioner was developed by mile2. The CHISSPs have become vital in managing and protecting healthcare data and are tasked to protect patient information by implementing, managing, and assessing proper IT controls for patient health information integrity.

Upon completion:

- Students will be ready to take the Certified Healthcare Information Systems Security Practitioner exam by Mile2. In addition, at the end of the CHISSP course, the student will be versed with best practices in the healthcare industry and will be able to establish a framework with current best practices in respects to privacy, regulation and risk management.

Who Should Attend:

- Information System Security Officers
- Privacy Officers
- Risk Managers
- Information Security Managers
- Information Systems Owners
- Compliance & Privacy Officers
