Training: Mile2
C)SLO - Certified Security Leadership Officer

TRAINING GOALS:

The vendor-neutral Certified Security Leadership Officer certification course was designed for mid and upper-level managers as well as any engineers who seek to increase their knowledge in the security arena. The C)SLO course was designed to give management an essential understanding of current security issues, best practices, and technology.

A C)SLO candidate can be seen as the bridge between the cybersecurity team and operations as well as business management. Essentials topics covered in this management track are extremely detailed and include the following: Network Fundamentals and Applications, Hardware Architecture, Information Assurance Foundations, Computer Security Policies, Contingency and Continuity Planning, Business Impact Analysis, Incident Handling, Architect Approaches to Defense in Depth, Cyber Attacks, Vulnerability Assessment and Management, Security Policies, Web Security, Offensive and Defensive Information Warfare, culminating with Management Practicum.

Upon completion:

- The Certified Security Leadership Officer candidate will not only be able to competently take the CSLO exam but will also be versed in implementing strong security controls and managing an organization with an industry acceptable security posture.

Who Should Attend:

- Information assurance managers/auditors
- System implementers/administrators
- Network security engineers
- IT administrators
- Auditors/auditees
- DoD personnel/contractors
- Federal agencies/clients
- Security vendors and consulting groups looking to stay current with frameworks for information assurance
