

Training: Mile2
C)SP - Certified Security Principles

TRAINING TERMS

2025-10-06 | 5 days | Kraków / Virtual Classroom
2025-11-03 | 5 days | Warszawa / Virtual Classroom

TRAINING GOALS:

Mile2®'s **C)SP+ Certified Security Principles+** course provides the skills necessary to apply and implement technical knowledge of security concepts in today's security environment. Students will gain an in depth knowledge of systems security, access control, network infrastructure, assessments and audits, cryptography and organizational security across all vendor products. These skills have become increasingly important, as additional safeguards such as intrusion detection systems, physical access control, and multi-factor authentication become standard methods of protection. Students are given real-world scenarios to reinforce the material covered and will learn how to apply the concepts to their daily operations.

Course objectives

- Fully understand Security from a real-world viewpoint
- Implement security controls on systems within an environment, network, data, servers, host, mobile, cloud
- Understand risk management and how each individual or department can be part of reducing risk
- Understand cryptography at the basic level to ensure a company is implementing this correctly
- Understand how to impose controls for mobile and IoT devices
- Prepare for the **CSP+ or Security+ certification**
- Become part of the solution for improving the security posture of your company

Upon completion

Upon completion, the **Certified Security Principles+** candidate will not only be able to competently take the **CSP+ exam** but will also understand basic cybersecurity knowledge to keep companies' IP and IT infrastructure safe.

Who Should Attend

- IT Professionals
- Server Administrators

- Network Administrators
- Virtualization and Cloud Administrators
- anyone that needs a general understanding of security
- those seeking the Security+ Certification, 8570 Directive
