TRAINING GOALS:

This course provides IT Security Professionals with the knowledge and skills needed to implement security controls, maintain an organization's security posture, and identify and remediate security vulnerabilities. This course includes security for identity and access, platform protection, data and applications and security operations.

Audience Profile:
This course is for Azure Security Engineers who are planning to take the associated certification exam, or who are performing security tasks in their day-to-day job.

CONSPECT:

- Protect identity and access in Azure
  - Module 1: Secure and manage identities with Microsoft Entra ID
  - Module 2: Manage access with Azure AD
- Protect network infrastructure in Azure
  - Module 1: Secure network connectivity in Azure
  - Module 2: Secure application delivery in Azure
  - Module 3: Protect public access to Azure resources
- Protect compute, storage, and databases
  - Module 1: Secure compute, storage, and databases
  - Module 2: Secure data in Azure
  - Module 3: Secure application secrets in Azure
- Strengthen security posture using Microsoft Defender for Cloud and Microsoft Sentinel
  - Module 1: Plan for security monitoring with Microsoft Defender for Cloud and Microsoft
