- Recognize the functionality of Domain Controllers and Active Directory Replication mechanisms.
- Understand Forest, Domain and OU structure.
- Recognize and understand the role of Active Directory Sites.
- Skills needed to determine Domain Controller Server versions, Forest and Domain Functional levels.
- Describe authentication Mechanisms in Active Directory NTLM and Kerberos.
- Optimize and maintain Group Policy Objects (GPO) used in Active Directory.
- Understand the functioning of Active Directory Partitions and the Global Catalog.
- Fundamental understanding of using Active Directory with Cloud Services like Federation Services and Azure.

## CONSPECT:

- Principles of Active Directory
  - Development of Active Directory

- What is X.500
- LDAP
- Active Directory Architecture
- NTLM and Kerberos
- Managing operating systems with GPOs, Workplace Join and InTune
- Active Directory Groups: Domain Local, Global and Universal
- Using and Managing Active Directory Domain Controllers
- Forest and Domain Functional Levels
- Introduction to Active Directory Partitions and the Global Catalog
- Basic Forest Structure and Design
- Basic Domain Structure and Design
- Basic OU Structure and Design
- Fundamentals of WAN management with Active Directory
  - Understanding AD Sites and WAN Traffic Management
  - Basic AD Sites and Logon Traffic
  - Introduction to AD Sites and Replication Traffic
  - Bridgehead Servers and Site Link Objects
  - Site Aware Applications
- Introduction to Active Directory Group Policy Objects
  - Introduction to Group Policy
  - Administrative Templates
  - Fundamental Concepts of GPO Scripts
  - Introduction to Creating and Using GPOs
  - Principles of Managing Multiple GPOs
  - Block, Enforce and Inheritance
  - GPOs and Active Directory Versions
  - Introduction to Controlling and Installing Software with GPOs, SRP and App Locker
- Principles of Active Directory Integration
  - Active Directory and “The Cloud”
  - User Principle Names, Authentication and Active Directory Federated Services
  - Conclusion, Additional Resources, Labs and Exercises

## REQUIREMENTS:

- Basic understanding of networking concepts.
- Basic Windows knowledge.

- Basic understanding of security concepts such as authentication and authorization

### Difficulty level

### CERTIFICATE:

Certificate of completing an authorized Microsoft training

### TRAINER:

Microsoft Certified Trainer
