

Training: Microsoft
MS-55320 Programming with HTML, CSS, and JavaScript

TRAINING GOALS:

This five-day instructor-led is intended for IT professionals interested in becoming client-side web developers. who need to get a jump start on all three technologies. The course includes more than 30 exercises, providing a rapid hands-on introduction to the three major client-side languages: HTML, CSS, and JavaScript. Students should be prepared to cover a lot of ground quickly.

This course covers the same technologies as the retired Course 20480-C: Programming in HTML5 with JavaScript and CSS3. Like that course, this course focuses on using HTML, CSS, and JavaScript to develop web pages, implement programming logic, define and use variables, perform looping and branching, capture and validate user input, store data, and create well-structured applications. However, this course does not cover the HTML5 APIs covered in 20480.

Students can take this course on any computer with a web browser. Although it's not required, we recommend Visual Studio Code as the editor.

Audience Profile

This course is intended for students new to computer programming or experienced programmers who are new to client-side web development.

At Course Completion

 - Textareas
 - Exercise: Adding a Select Menu and a Textarea
 - HTML Forms and CSS

- Lab: Exercises included throughout lesson
- Creating a Registration Form
- Adding Checkboxes and Radio Buttons
- Adding a Select Menu and a Textarea
- JavaScript Form Validation
 - Server-side Form Validation
 - HTML Form Validation
 - Accessing Form Data
 - Form Validation with JavaScript
 - Exercise: Checking the Validity of the Email and URL Fields
 - Checking Validity on Input and Submit Events
 - Adding Error Messages
 - Validating Textareas
 - Validating Checkboxes
 - Validating Radio Buttons
 - Validating Select Menus
 - Exercise: Validating the Ice Cream Order Form
 - Giving the User a Chance
 - Lab: Exercises included throughout lesson
- Regular Expressions
 - Getting Started
 - Regular Expression Syntax
 - Backreferences
 - Form Validation with Regular Expressions
 - Cleaning Up Form Entries
 - Exercise: Cleaning Up Form Entries
 - A Slightly More Complex Example
 - Lab: Exercises included throughout lesson
