COMPENDIUM CENTRUM EDUKACYJNE

Training: PRINCE2®
Scrum Master II

PeopleCert

[TRANING TERMS](#)

2025-08-28 | 2 days | Warszawa / Virtual Classroom

TRAINING GOALS:

Training + exam included

At this qualification level, candidates will be introduced to concepts, terms, principles and tools used in the Scrum framework and gain a deep understanding of Scrum best practices as well as a level of expertise that goes beyond a typical team leader or project manager through a unique combination of case studies, storytelling, and practical learning based on the real-life challenges that Scrum Masters face.

Holders of the PeopleCert SCRUM Master II certification, will be able to demonstrate their knowledge, understanding and practical application of:

- The true extent of what it means to think and act in an Agile way
- The mastery of the Scrum framework centered around the integration of roles, events, and Scrum artifacts, including and supporting the product backlog and sprint backlog
- The many soft skills necessary for the Scrum Master, such as servant leadership, facilitation, coaching and mentoring, problem solving, and removing impediments
- The key skills related to visual management for increasing transparency, inspection, and adaptation for success with your projects
- The importance of team dynamics, self-organizing, team building, and virtual teams
- The most important skills for successful Scrum Masters that are applied through different Scrum events from initial planning to the final retrospective
- The crucial strategies for scaling Scrum projects with multiple teams and complex products
