TRAINING GOALS:

This course can prepare you for the CompTIA Network+ (Exam N10-009) certification examination and a job role in network administration. It utilizes a learning progression model to help you learn and build skills related to the course objectives and job task requirements. This learning methodology uses a series of steps to contextualize what you're learning, elaborate on areas where additional instruction is needed, and provide relevance through practice and personalized feedback. You'll then apply what you learned and demonstrate the skills you've gained through a series of lab activities and quizzes.

On course completion, you will be able to:

- Deploy and troubleshoot Ethernet networks.
- Support IPv4 and IPv6 networks.
- Configure and troubleshoot routers.
- Support network services and applications.
- Ensure network security and availability.
- Deploy and troubleshooting wireless networks.
- Support WAN links and remote access methods.
- Support organizational procedures and site security controls.
- Summarize cloud and data center architecture.

Skills you'll learn

- Deploy wired and wireless devices, covering IP addressing, ports, protocols, and network

Compendium Education Center Ltd.
ul. Tatarska 5, 30-103 Kraków, tel.: (12) 298 47 77
ul. Postępu 18B, 02-676 Warszawa, tel.: (22) 417 41 70

BNP Paribas Bank Polska S.A.
EUR: PL 79 1600 1462 1853 6451 3000 0006
USD: PL 52 1600 1462 1853 6451 3000 0007

architecture for network deployment.
- Understand documentation, life-cycle, change, and configuration management processes and procedures.
- Grasp virtualization, cloud service models, elasticity, and scalability to apply cloud concepts.
- Monitor networks for high availability and resolve connectivity issues to maintain network performance.
- Establish secure networks and mitigate vulnerabilities to strengthen security.
- Diagnose and resolve network issues using appropriate tools for effective troubleshooting.

Job roles that benefit from Network+ skills

- Network Administrator
- Network Engineer
- System Administrator
- Information Technology (IT) Support Specialist
- Field Service Technician
- Network Analyst
- NOC (Network Operations Center) Technician
- Junior Cybersecurity Analyst

Each participant in an authorized training CompTIA Network+ Prep Course held in Compendium CE will receive a free N10-009 CompTIA Network+ Certification Exam vouchers.

CONSPECT:

- Explaining Network Topologies
  - Networking Overview
    - Networking Concepts
    - Network Types
    - Network Topology
    - Star Topology
    - Mesh Topology
    - Legacy Topologies
  - OSI Model Concepts
    - Open Systems Interconnection Model

Compendium Education Center Ltd.
ul. Tatarska 5, 30-103 Kraków, tel.: (12) 298 47 77

USD: PL 52 1600 1462 1853 6451 3000 0007

- Data Encapsulation and Decapsulation
- Layer 1 - Physical
- Layer 2 - Data Link
- Layer 3 - Network
- Layer 4 - Transport
- Upper Layers
- OSI Model Summary

- SOHO Networks
  - SOHO Routers
  - Physical Layer Functions
  - Data Link Layer Functions
  - Network Layer Functions
  - Transport and Application Layer and Security Functions
  - The Internet
  - Binary and Hexadecimal
- Troubleshooting Methodology
  - Network Troubleshooting Methodology
  - Identify the Problem
  - Identify Problem Symptoms
  - Establish a Theory of Probable Cause
  - Test the Theory to Determine the Cause
  - Establish a Plan of Action
  - Implement the Solution
  - Verify the Solution
  - Document Findings, Actions, and Outcomes
- Additional Resources
  - Network Terminology and Types
  - The OSI Model
  - Troubleshooting Methodology

- Supporting Cabling and Physical Installations
  - Ethernet
    - Network Data Transmission
    - Ethernet Standards
    - Media Access Control and Collision Domains
    - 100BASE-TX Fast Ethernet Standards
    - Gigabit Ethernet Standards

- Fiber Ethernet Standards
- Copper Cables and Connectors
  - Unshielded Twisted Pair Cable
  - Shielded and Screened Twisted Pair Cable
  - Cat Cable Standards
  - Twisted Pair Connector Types
  - Plenum and Riser-Rated Cable
  - Coaxial and Twinaxial Cable and Connectors
- Wiring Implementation
  - Structured Cabling System
  - T568A and T568B Termination Standards
  - Patch Panels
  - Structured Cable Installation
  - Termination Tools and Techniques
- Fiber Optic Cables and Connectors
  - Fiber Optic Cable Considerations
  - Single Mode Fiber and Multimode Fiber
  - Fiber Optic Connector Types
  - Fiber Optic Cable Installation
  - Fiber Distribution Panels
  - Multi-Fiber Push On Connectors
  - Wavelength Division Multiplexing
- Physical Installation Factors
  - Rack Systems
  - Humidity and Temperature
  - Power Management
  - Fire Suppression
- Cable Troubleshooting
  - Specification and Limitations
  - Cable Issues
  - Cable Category Issues
  - Cable Testers
  - Wire Map Testers and Tone Generators
  - Attenuation and Interference Issues
  - Crosstalk Issues
  - Fiber Optic Cable Testing Tools

REQUIREMENTS:

Recommended experience: CompTIA A+ certification, with 9 to 12 months of hands-on experience in a junior network administrator or network support technician role.

Difficulty level

CERTIFICATE:

The participants will obtain certificates signed by CompTIA (course completion). This course will help prepare you for the CompTIA Network+ certification exam, which is available through the Pearson VUE test centers.

Each participant in an authorized training CompTIA Network+ Prep Course held in Compendium CE will receive a free N10-009 CompTIA Network+ Certification Exam vouchers.

TRAINER:

Authorized CompTIA Trainer.
