TRAINING GOALS:

The Microsoft 365 Identity and Services course is designed for persons who are aspiring to the Microsoft 365 Enterprise Admin role. This course covers three central elements of Microsoft 365 enterprise administration – Microsoft 365 tenant and service management, Microsoft 365 management, and Microsoft 365 identity management. In tenant and service management, you will examine the key components of your Microsoft 365 tenant that must be planned for, implemented, and managed. This includes an introduction to the following Microsoft 365 platform services from the perspective of a Microsoft 365 Enterprise Administrator: Exchange Online, SharePoint Online, Microsoft Teams, and the Microsoft Power Platform components (Power Apps, Power Automate, Power BI, and Power Virtual Agents). In Microsoft 365 management, you transition to configuring Microsoft 365, with a primary focus on configuring Office client connectivity to Microsoft 365, managing Microsoft 365 Apps for Enterprise deployments, and configuring Office Telemetry and Workplace Analytics. In Microsoft 365 identity management, you will learn how to plan for and implement Azure AD Connect, how to manage synchronized identities, and how to design and manage solutions for external access.
