Training: AWS
AWS Certified Developer - Associate (DVA-C02) Exam

TRAINING GOALS:

The AWS Certified Developer - Associate (DVA-C02) exam is intended for individuals who perform a developer role. The exam validates a candidate's ability to demonstrate proficiency in developing, testing, deploying, and debugging AWS Cloud-based applications.

The exam also validates a candidate's ability to complete the following tasks:

- Develop and optimize applications on AWS.
- Package and deploy by using continuous integration and continuous delivery (CI/CD) workflows.
- Secure application code and data.
- Identify and resolve application issues

AWS Certified Developer - Associate is a great starting point on the AWS Certification path for individuals who may have any of the following:

- Experience working in a developer role with in-depth knowledge of at least one high-level programming language
- Experience in AWS technology
- Strong on-premises IT experience and understanding of mapping on-premises to cloud
- Experience working in other cloud services

The target candidate should have 1 or more years of hands-on experience developing and maintaining an AWS-based application.

Recommended general IT knowledge

The target candidate should have the following general IT knowledge:

- Proficiency in at least one high-level programming language
- Understanding of application lifecycle management
- Basic understanding of cloud-native applications to write code
- Ability to develop functional applications
- Experience in using development tools

Recommended AWS knowledge
