Training: AWS
AWS Certified SAP on AWS - Specialty (PAS-C01) Exam

TRAINING GOALS:

The AWS Certified: SAP on AWS - Specialty examination validates advanced technical skills and experience to design, implement, migrate, and operate SAP workloads optimally on AWS.

This examination validates an individual's ability to perform the following tasks:

- Design an SAP solution that runs in the AWS Cloud in adherence with the AWS Well-Architected Framework
- Design an SAP solution that runs in the AWS Cloud in adherence with SAP certification and support requirements
- Implement new SAP workloads on AWS
- Migrate existing SAP workloads to AWS
- Operate SAP workloads on AWS

AWS Certified: SAP on AWS - Specialty is intended for individuals in roles that require experience with both SAP and AWS. Before you take this exam, we recommend you have:

- Five or more years of SAP experience
- One or more years of experience working with SAP on AWS
- Ability to design an SAP solution that runs in the AWS Cloud in adherence with best practices laid out in the AWS Well-Architected Framework, and SAP certification and support requirements

The target candidate possesses the knowledge, skills, experience, and competence to design, implement, migrate, and operate SAP workloads on AWS.

This person likely has 5 or more years of SAP experience and 1 or more years of experience in working with SAP on AWS.

Recommended AWS knowledge:

- High availability/disaster recovery
- Core AWS infrastructure services
- AWS migration tools
- AWS global infrastructure
- Security best practices

- Multi-account scenarios and multi-Region scenarios

- Operations and management services and tools

- AWS transfer services

Recommended SAP knowledge and other IT knowledge:

- SAP Basis and SAP NetWeaver administration

- SAP supported databases (including SAP HANA)

- SAP supported operating systems (Linux and Windows)

- SAP migration and installation tools

- Sizing

- Identity management
