

Training: Microsoft  
MS-10968 Designing for Office 365 Infrastructure

FORM OF TRAINING	MATERIALS	PRICE	DURATION
Traditional	Digital materials	950 EUR	3 days
Traditional	CTAB Tablet	1050 EUR	3 days

## LOCATIONS

Krakow - 5 Tatarska Street, II floor, hours: 9:00 am - 4:00 pm

Warsaw - 17 Bielska Street, hours: 9:00 am - 4:00 pm

## TRAINING GOALS:

This intensive instructor-led course provides students with the knowledge and experience to implement Office 365 in a large corporate environment using the FastTrack three-phase delivery process of Pilot, Deploy, and Enhance. The course consists of two distinct parts:

- Part One is the training phase of the course and consists of six modules. Each module has an associated paper-based lab that is based on an actual, real-world Office 365 deployment involving a medium-sized enterprise organization. The aim of the scenario is to confirm that students have learned the concepts from the modules.
- Part Two is the testing phase and consists of a different scenario based on another real-world deployment, this time involving a large enterprise deployment. During the case study, students will work in groups to create a design solution for the organization that is based on the information provided in the scenario and gained from interviewing the instructor, who will role-play the part of the customer. Each group will then present its design to the remainder of the class.

## CONSPECT:

- Module 1: The Office 365 Deployment Challenge
  - Reviewing Office 365
  - Introducing the FastTrack Deployment Methodology
  - Getting to the Pilot
- Module 2: Planning the Pilot Phase
  - Overview of the Pilot Phase

- Identifying Environmental and Software Prerequisites
- Planning for Pilot Users
- Planning for Team Collaboration
- Module 3: Planning the Deploy Phase - Part 1
  - Overview of the Deploy Phase
  - Planning Service Selection
  - Planning Networking and Domains
  - Planning User Management
- Module 4: Planning the Deploy Phase - Part 2
  - Planning Email Migration
  - Planning SharePoint Site Collections and sites
  - Planning Lync Online
  - Planning Office 365 ProPlus Deployment
- Module 5: Planning the Enhance Phase - Part 1
  - Overview of the Enhance Phase
  - Planning Single Sign-On
  - Planning Hybrid Exchange Deployments
- Module 6: Planning the Enhance Phase - Part 2
  - Planning Exchange Online Protection
  - Planning SharePoint Online Customization
  - Planning Hybrid SharePoint Implementations
- Module 7: Case Study

## REQUIREMENTS:

Before attending this course, students must have:

- At least one year of experience with Office 365 and at least two years of in-role experience as a consultant or IT Professional.
- Knowledge of the individual components of Office 365, such as **Microsoft Exchange**, **Microsoft SharePoint**, **Microsoft Lync**, and **Office 365 ProPlus**.
- Experience with the Office 365 platform and its administrative console.
- Experience with **Active Directory**, Windows Azure Active Directory, Directory Synchronization (DirSync) and single sign-on (SSO) with Active Directory Federation Services (ADFS) 2.0.
- Successful deployment experience of Office 365 in a customer-facing engagement.
- Knowledge of the principles of IT project design.
- Ability to present and peer-review a project design.

## Difficulty level

## CERTIFICATE:

The participants will obtain Microsoft certificates.

## TRAINER:

Microsoft Certified Trainer.
