

Training: Red Hat

**RH402 Red Hat Enterprise Deployment, Virtualization, and Systems Management with EX401 Exam**

FORM OF TRAINING	MATERIALS	PRICE	DURATION
Traditional	Hardcopy	3150 EUR	5 days
Traditional	CTAB Tablet	3250 EUR	5 days
Distance learning	Hardcopy	3150 EUR	5 days
Distance learning	CTAB Tablet	3150 EUR	5 days

**LOCATIONS**

Krakow - 5 Tatarska Street, II floor, hours: 9:00 am - 4:00 pm

Warsaw - 17 Bielska Street, hours: 9:00 am - 4:00 pm

**TRAINING GOALS:**

**RH402 Red Hat Enterprise Deployment, Virtualization, and Systems Management with EX401 Exam** explores the concepts and methods necessary for successful large-scale deployment and management of Red Hat Enterprise Linux systems. Students will learn how to install and use Red Hat Satellite server with enhanced entitlements reporting to deploy and manage systems. By the end of this course, students will have built their own RPM packages and will have used Subversion to manage changes to files. This course can also help you prepare for the [EX401](#) Exam.

**CONSPECT:**

- Essential system management
  - Set high-level goals for effective system management.
- Install Red Hat Satellite
  - Install a Red Hat Satellite server, and populate it with software channel content.
- Red Hat Satellite organization
  - Create and manage Red Hat Satellite organizations, users, and system groups.
- Use Subversion to manage changes
  - Initialize and configure a Subversion repository, start a new Subversion project, and manage revisions using Subversion.
- Red Hat Satellite client configuration
  - Register client machines with Red Hat Satellite both interactively and in automated ways.
- Red Hat Satellite software management

- Configure Red Hat Satellite with custom and cloned software channels to manage software updates on client systems.
- Build RPM packages
  - Create RPM packages for use with Red Hat Satellite to enable the deployment of programs and files on client systems.
- Configuration file management with Satellite
  - Use Red Hat Satellite to deploy individual configuration files to client systems.
- Provision with Red Hat Satellite
  - Use Red Hat Satellite to provision Red Hat Enterprise Linux systems from bare-metal.
- Red Hat Satellite administration
  - Perform Red Hat Satellite maintenance functions including embedded database management, activate Satellite with a new entitlement certificate, and export custom software channel content.
- Red Hat Satellite API and reports
  - Use the Red Hat Satellite API to produce simple reports and perform basic administrative tasks.
- Red Hat Satellite virtual machine management
  - Manage Red Hat Satellite entitlements and create kickstart profiles that will provision virtualization hosts and virtualized guests.
- Comprehensive review
  - Review course material and deploy a Red Hat Satellite server.

## REQUIREMENTS:

- An [RHCE certification](#) or equivalent experience. Note: An RHCE is required to take the exam (**EX401**) or purchase a version of this course that includes the exam.
- Students without an **RHCE certification** are encouraged to check their experience levels by taking a free online skills assessment at [http://www.redhat.com/training/skills\\_assessment](http://www.redhat.com/training/skills_assessment).

## Difficulty level

## CERTIFICATE:

Participants will obtain certificates signed by Red Hat.

## TRAINER:

Red Hat Certified Instructor.
