Training: SUSE
SUSE eLearning Subscription Silver Level

TRAINING GOALS:

SUSE eLearning is digital learning de- signed to help your team master SUSE technology. Whether they need access to bite-sized videos to solve an im- mediate challenge or a more structured learning path leading to certification, SUSE eLearning is the instant, intelligent way to train.

With eLearning, SUSE brings our world- class technical training directly to your enterprise, offering:

- Flexible learning – Flexibility means providing your team with intelligent, agile learning opportunities. SUSE eLearning does this by allowing your team the ability to learn at their own pace, in their own time, and independent of location.

The subscription also entitles users to the latest SUSE technical training as soon as it is available. There are two tiers of eLearning:

- Individual - perfect for your administrator. Each annual subscription is tied to one named user. The individual tier has two levels - Silver and Gold. The Gold Level provides access to live labs and Certification vouchers.
- Enterprise - perfect for your team. Each annual subscription provides eLearning access to up to 5 named users, which can be swapped out as needed.

- Limitless learning – Limitless means the ability to take as many courses as you need as often as you need to. Subscriptions provide you the power to get the skills needed to move your business forward. Take classes as needed retake classes to master a skill, or follow a defined learning path. The choices are endless.
- Cost effective learning – Giving your team access to eLearning is a fraction of the cost of sending your team to training and being without them. Now they can learn the skills they need when they need them. For a customized approach, use eLearning with custom training for a deep dive into areas you need to move your business forward. Get and retain the skilled workers you need to modernize your business.

Conspect

SUSE eLearning Subscription includes access to our entire catalog of online learning content, video classroom courses, learning paths, and first-to-market content. This includes all current SUSE online training courses and video classroom courses as well as any new courses that SUSE releases during

Compendium Centrum Edukacyjne Spółka z o.o.
