

Training: Alcatel-Lucent Enterprise Alcatel-Lucent OmniSwitch AOS - Series (DT00WTE109)

Please contact us by phone using the form below in order to perform calculations as training

TRAINING GOALS:

At the end of the course, the participant will be able to understand the main OSI layer 2 and layer 3 networking basic concepts like ARP, Routing, QoS. Understand the capabilities and hardware characteristics of each chassis, board, stacks for the OmniSwitch 6xxx, 9xxx and 10k series. Understand the management possibilities like CLI, Webview and OmniVista 2500 NMS.

This course is really a must-have for people who will integrate the training tracks, because it avoids the participant losing time studying the details of each hardware component during the class, thus allowing the focus on the administration part and the practical hands-on.

CONSPECT:

- Networking basics
- OmniSwitch hardware
- Device management
- Security Features

REQUIREMENTS:

- Students should be familiar with basic networking terminology and concepts.

Difficulty level

CERTIFICATE:

The participant will obtain certificates signed by Alcatel Lucent.

TRAINER:

ACFE Instructor - Alcatel-Lucent Certified Field Expert Instructor.
