TRAINING GOALS:

Course version 1.

Many organizations require an Information System Auditor's expert knowledge when it comes to identifying critical issues and providing effective auditing solutions. The knowledge and course content provided in the vendor-neutral Certified Information Systems Security Auditor - C)ISSA will not only cover ISACA®'s exam but will provide a measurable certification that demonstrates proficiency in the IS Auditing Field.

The Certified Information Systems Security Auditor covers the skills and knowledge to assess vulnerabilities, report on compliance and implement controls for private and public enterprises.

The Certified Information Systems Security Auditor students will receive in-depth knowledge in topics that pertain to the following: IS audit, control, and assurance. This course is designed for those IT professionals in the following job roles: IT consultants, auditors, managers, security policy writers, privacy officers, information security officers, network administrators, security device administrators, and security engineers.

Upon completion:

- The Certified Information Systems Security Auditor students will be able to establish industry acceptable auditing standards with current best practices and policies. Students will also be prepared to competently take the CISSA exam.

Who Should Attend:

- IS Security Officers
- IS Managers
- Risk Managers
- Auditors
- Information Systems Owners
- IS Control Assessors
- System Managers
- Government
