## TRAINING GOALS:

In this 2-day instructor-led classroom or online class, you will learn to deploy, configure, and troubleshoot Fortinet's web application firewall: **FortiWeb**.

Instructors will explain key concepts that affect security in web applications, and then also lead lab exercises where you can explore operating modes and demonstrate protection options that each mode supports. Through traffic and attack simulations with real web applications in the lab, you will learn how to distribute load from virtual servers to real servers while enforcing logical parameters, inspecting flow, and securing HTTP session cookies.

**Course is based on the system version 5.3.**
